Sustainable Energy Investment Joseph Nyangon, John Byrne, 2021-03-10 This book examines the technical market and policy innovations for unlocking sustainable investment in the energy sector. While finalizing this book, the COVID-19 pandemic is cutting a devastating swath through the global economy, causing the biggest fall in energy sector investment, exacerbating the global trade finance gap, worsening signs of growing income inequality, and devastating the health and livelihoods of millions. What is the parallel between the COVID-19 pandemic and the climate change crisis? The impacts of the global pandemic are expected to last for a few years, whereas those associated with the climate crisis will play out over several decades with potentially irreversible consequences. However, both show that the cost of inaction or delay in addressing the risks can lead to devastating outcomes or a greater probability of irreversible catastrophic damages. In the context of sustainable energy investment and the transition to a low-carbon, climate-resilient economy, what ways can financial markets and institutions support net-zero emission activities and the shift to a sustainable economy, including investment in energy efficiency, low-carbon, and renewable energy technologies? This book provides students, policymakers, and energy investment professionals with the knowledge and theoretical tools necessary to address related questions in sustainable energy investment, risk management, and energy innovation agendas.

Portfolios in the Classroom Beth Schipper, Joanne Rossi, 1997 The wonderful effect of the portfolio process is the self-awareness that develops when kids generate their own selection criteria, make decisions, and reflect on their work. When students discuss what they want to include in their portfolio and why, and analyze which project or piece of writing meets those criteria, they are creating connections to learning far beyond the scope of traditional forms of assessment. Portfolios also increase learning because students take responsibility for their learning, actively engage in the learning process, think about their own thinking, grow in confidence and self-esteem, set goals for future learning. Using portfolios enables teachers to be clearer in their presentation.
