

POP LOOKS BACH

Theme from 'Ski Sunday'

SAM FONTEYN

Arranged by CHRISTOPHER NORTON

With verve

The piano score is written for a single instrument, likely piano, in 4/4 time. It consists of five systems of music. The first system begins with a treble clef and a bass clef, with a forte (f) dynamic marking. The second system includes a mezzo-forte (mf) dynamic marking. The third system includes a G7 chord marking. The fourth system includes a G chord marking. The fifth system includes a mezzo-forte (mf) dynamic marking. The score features various musical notations including chords (C, Cmaj, G, G7), dynamics (f, mf), and articulation marks.

Sit Down and Cheer Martin Kelner, 2012-09-27 Television and sport is the ultimate marriage of convenience The two circled each other warily for a while sport anxious the sofa bound might spurn the live product TV reluctant in a limited channel world to hand over too much screen time to flannelled fools and muddled oafs But they got together and stayed together for the sake of the money and now you cannot imagine one without the other They are indivisible like an old couple sitting in a teashop finishing each other's sentences and there is little doubt which is the dominant partner You have only to think of the recent sports stars who have left their muddy fields to don sequins grab partners and tango their way across the stage in ultimate Saturday night television style to see how far the two have come on their journey together In *Sit Down and Cheer* Martin Kelner traces the development of this relationship from its humble origins in the 1960 Olympics by way of the first ever Match of the Day in 1964 through to the financial impact of Sky right up to the high tech gadgetry of our present day viewing Insightful and very funny this is an entertaining exploration of two major national pastimes and not to be missed

Persistent Homology and Discrete Fourier Transform Victoria Callet-Feltz, 2025-07-02 This book proposes contributions to various problems in the field of topological analysis of musical data the objects studied are scores represented symbolically by MIDI files and the tools used are the discrete Fourier transform and persistent homology The manuscript is divided into three parts the first two are devoted to the study of the aforementioned mathematical objects and the implementation of the model More precisely the notion of DFT introduced by Lewin is generalized to the case of dimension two by making explicit the passage of a musical bar from a piece to a subset of $\mathbb{Z}^t \times \mathbb{Z}^p$ which leads naturally to a notion of metric on the set of musical bars by their Fourier coefficients This construction gives rise to a point cloud to which the filtered Vietoris Rips complex is associated and consequently a family of barcodes given by persistent homology This approach also makes it possible to generalize classical results such as Lewin's lemma and Babitt's Hexachord theorem The last part of this book is devoted to musical applications of the model the first experiment consists in extracting barcodes from artificially constructed scores such as scales or chords This study leads naturally to song harmonization process which reduces a song to its melody and chord grid thus defining the notions of graph and complexity of a piece Persistent homology also lends itself to the problem of automatic classification of musical style which will be treated here under the prism of symbolic descriptors given by statistics calculated directly on barcodes Finally the last application proposes an encoding of musical bars based on the Hausdorff distance which leads to the study of musical textures The book is addressed to graduate students and researchers in mathematical music theory and music information research but also at researchers in other fields such as applied mathematicians and topologists who want to learn more about mathematical music theory or music information research
