Lecture Notes in Data Mining Michael W. Berry,Murray Browne,2006 The continual explosion of information technology and the need for better data collection and management methods has made data mining an even more relevant topic of study Books on data mining tend to be either broad and introductory or focus on some very specific technical aspect of the field This book is a series of seventeen edited OC student authored lecturesOCO which explore in depth the core of data mining classification clustering and association rules by offering overviews that include both analysis and insight The initial chapters lay a framework of data mining techniques by explaining some of the basics such as applications of Bayes Theorem similarity measures and decision trees Before focusing on the pillars of classification clustering and association rules the book also considers alternative candidates such as point estimation and genetic algorithms The book s discussion of classification includes an introduction to decision tree algorithms rule based algorithms a popular alternative to decision trees and distance based algorithms Five of the lecture chapters are devoted to the concept of clustering or unsupervised classification The functionality of hierarchical and partitional clustering algorithms is also covered as well as the efficient and scalable clustering algorithms used in large databases The concept of association rules in terms of basic algorithms parallel and distributive algorithms and advanced measures that help determine the value of association rules are discussed The final chapter discusses algorithms for spatial data mining Sample Chapter s Chapter 1 Point Estimation Algorithms 397 KB Contents Point Estimation Algorithms Applications of Bayes Theorem Similarity Measures Decision Trees Genetic Algorithms Classification Distance Based Algorithms Decision Tree Based Algorithms Covering Rule Based Algorithms Clustering An Overview Clustering Hierarchical Algorithms Clustering Partitional Algorithms Clustering Large Databases Clustering Categorical Attributes Association Rules An Overview Association Rules Parallel and Distributed Algorithms Association Rules Advanced Techniques and Measures Spatial Mining Techniques and Algorithms Readership An introductory data mining textbook or a technical data mining book for an upper level undergraduate or graduate level course **Diet-step** Fred A.
