Population and Development Frank Furedi, 1997 Many experts believe that population growth is the greatest threat facing humanity This concise and provocative book discusses both sides of this debate examining the way the arguments have changed and evolved and questioning the assumptions of the main protagonists Frank Furedi argues that the Western preoccupation with population growth reveals more about the internal concerns of Western societies than the socio economic development of the South Examining a broad range of key debates and controversies the population bomb in Asia the culture of a distinct regime of African fertility the role of education in stabilizing population growth in Kerala he contends that the marginalization of the goal of development is the outcome of a narrow concern with population policies **The**

Demographics of Empire Karl Ittmann, Dennis D. Cordell, Gregory H. Maddox, 2010-10-05 The Demographics of Empire is a collection of essays examining the multifaceted nature of the colonial science of demography in the last two centuries The contributing scholars of Africa and the British and French empires focus on three questions How have historians demographers and other social scientists understood colonial populations What were the demographic realities of African societies and how did they affect colonial systems of power Finally how did demographic theories developed in Europe shape policies and administrative structures in the colonies The essays approach the subject as either broad analyses of major demographic questions in Africa s history or focused case studies that demonstrate how particular historical circumstances in individual African societies contributed to differing levels of fertility mortality and migration Together the contributors to The Demographics of Empire question demographic orthodoxy and in particular the assumption that African societies in the past exhibited a single demographic regime characterized by high fertility and high mortality **The Blackwell**
