## **Population And People:**

**Including the group quarters population in the US synthesized population database** Bernadette Chasteen, William Wheaton, Phillip Cooley, Laxminarayana Ganapathi, Diane Wagener., 2011-02-02 In 2005 RTI International researchers developed methods to generate synthesized population data on US households for the US Synthesized Population Database These data are used in agent based modeling which simulates large scale social networks to test how changes in the behaviors of individuals affect the overall network Group quarters are residences where individuals live in close proximity and interact frequently Although the Synthesized Population Database represents the population living in households data for the nation s group quarters residents are not easily quantified because of US Census Bureau reporting methods designed to protect individuals privacy Including group quarters population data can be an important factor in agent based modeling because the number of residents and the frequency of their interactions are variables that directly affect modeling results Particularly with infectious disease modeling the increased frequency of agent interaction may increase the probability of infectious disease transmission between individuals and the probability of disease outbreaks This report reviews our methods to synthesize data on group quarters residents to match US Census Bureau data Our goal in developing the Group Quarters Population Database was to enable its use with RTI s US Synthesized Population Database in the Modeling of Infectious Diseases Agent Study Jerusalem: Facts and Trends 2009/2010 , **SSc-Social Science-TB-09-R** Malti Mallik, Anita Jain, SK Jha and Dinesh Bhatt, SSc Social Science TB 09 R **Projection of Urban Personal Transportation Demand** Peat, Marwick, Livingston & Co, 1968 **A Dictionary of Economics and Commerce** T. ethnic and religious groups exist beyond the confines of frontiers In Africa for example hundreds of ethnic groups were divided by colonial borders and many retained kinship connections to their brethren in other countries thus creating cross border ethnic religious affinity Such cross border connections affect a variety of foreign policy from diplomacy to the use of force An internal problem can spread to other states or external actors can become involved in domestic disputes due to such factors Therefore data on cross border connections are essential to measure and assess their actual or potential effects on foreign policy or conflict This unique resource serves both qualitative and quantitative researchers For ease of use it is divided in sections for each region of world with the entries organized by pairs of contiguous countries Each entry for a pair of countries briefly discusses the ethnic and religious groups that are common to both countries and the historical and current connections between these groups The entries are organized based on the Correlates of War country codes which are widely used by researchers and allow for country pairs to be organized geographically within each section to facilitate easy use of the data
