Parents Who Think Too Much Anne Cassidy, 2010-10-06 With the baby boom generation came the genre of parenting books that told parents how to teach their kids everything from toilet training to developing self-esteem. Generally, the message has been: go easy on your child but hard on yourself. It is starting to become apparent, especially in the best of families, that giving your kids lots of choices, validating their feelings at great peril to your own, and providing enough individual attention for each child is creating a generation of kids over whom we have no control. Cassidy argues that this comes from overthinking our role as parents. We've pondered every step so much that the juice, the joy, and worst of all, our confidence is gone. The reasons are clear. We have fewer children later in life, so we've had more time to ponder. We've grown up just as research on infant and child development has come of age, so there's no shortage of material to think about. As a generation, we've prided ourselves on self-improvement and we bring the same zeal to child improvement. We're less likely to live close to our families and so are more likely to seek out expert solutions. To counter this thinking, Cassidy will suggest keeping the big picture in mind: what kind of people do you really want your kids to be? Honest, kind, cooperative, empathetic. It may mean losing sight of whether enough play dates are scheduled for the week, and if you've positively reinforced the latest creative endeavor, but it will bring back your instincts about what is important to your family as a whole and to your kids: to become decent people.

The Parent App Lynn Schofield Clark, 2013 New technologies offer new ways for families to connect, access ideas, and entertainment and manage the risks faced by children and teens, but they also bring more responsibilities, choices, and challenges. Clark argues that families experience digital and mobile technologies in their children's lives especially during the preteen and teen years quite differently, depending on whether they are middle

class or less advantaged Based on over ten years of interviews hundreds of parents and children The Parent App explores these differences and provides the kind of guidance backed by thorough research that parents today desperately need
