Portrait Of The Family Within The Total Economy:

Portrait of the Family Within the Total Economy Graeme Donald Snooks, 1994-07-18 The household sector is the forgotten economy of the Western world Yet it is an institution that has always played a central role in the operation of economic systems and in the way these systems have changed through time This book which focuses on the Australian case looks at the role of the household economy in the process of economic change It considers the household within the context of the total economy and also identifies and analyses longrun dynamic processes in Western society since the Industrial Revolution This is the first attempt to analyse the dynamics of the total economy over such a long period of time Soundly based on new estimates of household and market economic activity for Australia the book challenges accepted theoretical and empirical notions in this area Professor Snooks pioneering book makes an important contribution to economics economic measurement and economic history

Australian Economic History Claire E. F. Wright, 2022-06-02 In a time of pandemics war and climate change fostering knowledge that transcends disciplinary boundaries is more important than ever Economic history is one of the world s oldest interdisciplinary fields with its prosperity dependent on connection and relevance to disciplinary behemoths economics and history Australian Economic History is the first history of an interdisciplinary field in Australia and the first to set the field s progress within the structures of Australian universities It highlights the lived experience of doing interdisciplinary research and how scholars have navigated the opportunities and challenges of this form of knowledge These lessons are vital for those seeking to develop robust interdisciplinary conversations now and in the future This previously untold story of economic history in Australia exposes the centrality of economic thought and scholarship to Australian intellectual and political life Deftly positioning economic history in an innovative institutional place based and person focused narrative Claire Wright entangles economics with the history of education to produce a tale of university interdisciplinarity influence and impact Written with vitality and bursting with both data and anecdote this book makes an exceptional contribution to the intersecting fields of history economics and higher education studies Hannah Forsyth author of A History of the Modern Australian University Few readers would expect to find a classical tragedy in the story of an academic field Yet that is what Claire Wright shows us in this study of Economic History as it has been practiced in Australia She traces the field from legendary beginnings to triumphant growth to organisational collapse and renaissance on other terms Carefully researched and vigorously written this book raises questions about disciplines and interdisciplinary fields universities and markets and social bases of intellectual work that are relevant to all fields today Raewyn Connell author of The Good University Australia proved a pioneer in the study of economic history nurturing a discipline with innovative data and understanding of material trends Yet by the 1990s economic history departments closed as senior scholars retired and the field was subsumed by conventional economics In this absorbing study Dr Claire Wright challenges the conventional account She is tough minded about financial and institutional pressures on the field but cautiously optimistic about the future It is a

mistake she argues to see institutional representation as the benchmark of influence Instead the interdisciplinary nature of economic history has encouraged new research and teaching across the humanities and social sciences With close attention to individual scholars and their university departments and a deep sense of the trajectory of the field Australian Economic History Transformations of an Interdisciplinary Field is an original and important contribution to Australian intellectual history Glyn Davis Distinguished Professor of Political Science in the Crawford School of Public Policy The Australian National University

Historical Analysis in Economics Graeme Snooks, 2019-10-19 Neo classical economics is frequently criticised for paying inadequate attention to historical processes However it has proved easier to make broad claims that history matters than to theorise with any depth about the appropriate role for history in economic analysis Historical Analysis in Economics considers what history can contribute to the science of economics how would it matter if history mattered

The Laws of History Graeme Snooks, 2002-09-26 In this unorthodox and trail blazing work Graeme Snooks argues that it is possible to construct a scientific theory of human history but only if we adopt a radically materialist theory of human nature
