Portraits A Face For Every Mask

Joseph Parker Norris

Portraits A Face For Every Mask:

Face and Mask Hans Belting, 2022-06-14 A cultural history of the face in Western art ranging from portraiture in painting and photography to film theater and mass media This fascinating book presents the first cultural history and anthropology of the face across centuries continents and media Ranging from funerary masks and masks in drama to the figural work of contemporary artists including Cindy Sherman and Nam June Paik renowned art historian Hans Belting emphasizes that while the face plays a critical role in human communication it defies attempts at visual representation Belting divides his book into three parts faces as masks of the self portraiture as a constantly evolving mask in Western culture and the fate of the face in the age of mass media Referencing a vast array of sources Belting's insights draw on art history philosophy theories of visual culture and cognitive science He demonstrates that Western efforts to portray the face have repeatedly failed even with the developments of new media such as photography and film which promise ever greater degrees of verisimilitude In spite of sitting at the heart of human expression the face resists possession and creative endeavors to capture it inevitably result in masks hollow signifiers of the humanity they're meant to embody From creations by Van Eyck and August Sander to works by Francis Bacon Ingmar Bergman and Chuck Close *Face and Mask* takes a remarkable look at how through the centuries the physical visage has inspired and evaded artistic interpretation

A Study of Shakespeare's Portraits William Page, 1875

Virtual and Augmented Reality in Education, Art, and Museums Guazzaroni, Giuliana, Pillai, Anitha S., 2019-11-22 Due to the growing prevalence of artificial intelligence technologies schools museums and art galleries will need to change traditional ways of working and conventional thought processes to fully embrace their potential Integrating virtual and augmented reality technologies and wearable devices into these fields can promote higher engagement in an increasingly digital world *Virtual and Augmented Reality in Education Art and Museums* is an essential research book that explores the strategic role and use of virtual and augmented reality in shaping visitor experiences at art galleries and museums and their ability to enhance education Highlighting a range of topics such as online learning digital heritage and gaming this book is ideal for museum directors tour developers educational software designers 3D artists designers curators preservationists conservationists education coordinators academicians researchers and students

Fictional Labor Jiewon Baek, 2022-07-15 This book advocates for the ethically formative labor that fiction accomplishes As a force of production the fictional labor of literature and the visual arts shapes the formation of collective meaning in an era marked by the negligence of social financial and environmental responsibility As neoliberalism's hegemony since the 1980s has intensified through the proliferation of digital technologies in the 21st century considering works of creative art as an ethically productive force is a necessary complement to political and economic critiques The book invites readers to rethink how mutations in the production circulation and consumption of literary and visual materials are implicated in the commodification of information and attention for private gain The link can have a positive effect that transforms the social

relation from a capitalist ethos that expends life for profit to an alterity driven ethos that defends life But remedying the paucity of moral sentiments of social existence requires fictional labor to generate ethical sensibilities cares desires and wills The book's close analyses demonstrate the aesthetic and formal aspects of literary and visual art that mediate between social relations to yield a dependence alterity including the otherness of a precarious present a menacing future beyond economic mastery and an environment enmeshed with living beings and things

Portraiture Richard Brilliant, 2013-05-15 This is the first general and theoretical study devoted entirely to portraiture Drawing on a broad range of images from Antiquity to the twentieth century which includes paintings sculptures prints cartoons postage stamps medals documents and photographs Richard Brilliant investigates the genre as a particular phenomenon in Western art that is especially sensitive to changes in the perceived nature of the individual in society The author's argument on behalf of portraiture and he draws on examples by such artists as Botticelli Rembrandt Matisse Warhol and Hockney does not comprise a mere survey of the genre nor is it a straightforward history of its reception Instead Brilliant presents a thematic and cogent analysis of the connections between the subject matter of portraits and the beholder's response the response he or she makes to the image itself and to the person it represents Portraiture's extraordinary longevity and resilience as a genre is a testament to the power of this imaginative transaction between the subject the artist and the beholder

The Selfie, Temporality, and Contemporary Photography Claire Raymond, 2021-05-09 This book is a theoretical examination of the relationship between the face identity photography and temporality focusing on the temporal episteme of selfie practice Claire Raymond investigates how the selfie's involvement with time and self emerges from capitalist ideologies of identity and time The book leverages theories from Katharina Pistor Jacques Lacan Ragnvaldur Ingthorsson and Hans Belting to explore the ways in which the selfie imposes a dominant ideology on subjectivity by manipulating the affect of time The selfie is understood in contrast to the self portrait Artists discussed include James Tylor Shelley Niro Ellen Carey Graham MacIndoe and LaToya Ruby Frazier The book will be of interest to scholars working in visual culture history of photography and critical theory It will also appeal to scholars of philosophy and in particular of the intersection of aesthetic theory and theories of ontology epistemology and temporality

Scribner's Monthly, an Illustrated Magazine for the People, 1874 The British Journal of Photography, 1876 The Portraits of Shakespeare Joseph Parker Norris, 1884 A dictionary of Greek and Roman antiquities, ed. by W. Smith Greek antiquities, 1890

The Hybrid Face Massimo Leone, 2023-12-12 This original and interdisciplinary volume explores the contemporary semiotic dimensions of the face from both scientific and sociocultural perspectives putting forward several traditions aspects and signs of the human utopia of creating a hybrid face The book semiotically delves into the multifaceted realm of the digital face exploring its biological and social functions the concept of masks the impact of COVID 19 AI systems digital portraiture symbolic faces in films viral communication alien depictions personhood in video games online intimacy and digital memorials The human face is increasingly living a life that is not only that of the biological body but also that of

its digital avatar spread through a myriad of new channels and transformable through filters post productions digital cosmetics all the way to the creation of deepfakes The digital face expresses new and largely unknown meanings which this book explores and analyzes through an interdisciplinary but systematic approach The volume will interest researchers scholars and advanced students who are interested in digital humanities communication studies semiotics visual studies visual anthropology cultural studies and broadly speaking innovative approaches about the meaning of the face in present day digital societies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
