President's Management Legislative Initiatives United States. Congress. Senate. Committee on Governmental Affairs, 1986 **HC 466 - The Government's Productivity Plan** Great Britain. Parliament. House of Commons. Business, Innovation and Skills Committee, 2015 The Government s Productivity Plan was launched in July 2015 The Government considers it to be the first devoted sign of such a specific commitment to all the issues that are relevant for productivity We welcome the Government s focus on productivity When it comes to the success of British businesses and the UK economy we share the aspiration of the Government that the Plan is a success That is why our first announced inquiry was into the Plan and we will continue to scrutinise its implementation throughout the Parliament However we are concerned that the document has been described by many businesses as being too vague and long a document to be practical and that its lack of specific and measurable policies means that there is a risk that the document is destined to collect dust on bookshelves across Whitehall We have recommended that the Government produces a clear supplementary document outlining the proposed implementation and measure of success of each policy in the Productivity Plan The Chancellor of the Exchequer published his Spending Review and Autumn Statement 2015 towards the end of our inquiry and we conclude this Report by considering whether and how that Review has moved the Productivity Plan forward **Office 365 for Healthcare**

HL 100 - Building Better Places The Stationery Office,2016 The built environment affects us all The planning design management and maintenance of the built environment has a long term impact upon people and communities It is widely acknowledged that the quality of life prosperity health and wellbeing of an individual is heavily influenced by the place in which they live or work Policy towards the built environment in England is not the sole preserve of any one Government department this both accounts for the diverse range of elements which comprise the built environment and reflects the diverse range of impacts which it has upon people and communities There is an urgent need to co ordinate and reconcile policy across numerous different areas and priorities Recently however one priority has become dominant in debates concerning built environment policy Increasing the overall supply of housing and the speed at which housing is delivered is a central part of the Government s policy agenda When seen in the context of the housing crisis facing many communities across England this is understandable and overall we welcome the Government focus on increasing and speeding up the supply of housing Restrictions on financial freedoms and flexibilities however pose a threat to the ability of local authorities to build houses of their own The private sector throughout the post war period has very rarely achieved the delivery of 200 000 homes a year We do not believe the Government can deliver the stepchange required for housing supply without taking measures to allow local authorities and housing associations each to play their full part in delivering new homes In addition Government initiatives have so far failed to address a further part of the housebuilding problem which is the gap between planning permissions granted and new homes built We recommend measures intended to address this and other barriers to increasing the number of housing completions **Updated Central Visayas Region Development Plan, 1984-1987**
