It is a pervasive condition that influences human decision-making at every level, from individual choices to the way we will allocate the resources of society. Its causes, effects, and implications for society.

Defining Scarcity: Scarcity arises from the limited nature of resources, including shortages of goods, services, and talent, relative to the unlimited wants and needs of society. Causes of Scarcity: Scarcity can be caused by natural factors, such as limited land, water, and energy, or by human actions, such as overpopulation, environmental degradation, and inefficient resource allocation. Effects of Scarcity: Scarcity influences human behavior in several ways. It prompts choices about how to allocate resources, leading to competition and trade-offs. It also drives innovation and efficiency, as people seek ways to overcome resource limitations.
