Collection Thinking Jason Camlot, Martha Langford, Linda M. Morra, 2022-09-07 *Collection Thinking* is a volume of essays that thinks across and beyond critical frameworks from library archival and museum studies to understand the meaning of collection as an entity and as an act. It offers new models for understanding how collections have been imagined and defined, assembled, created, and used as cultural phenomena. Featuring over 70 illustrations and 21 original chapters that explore cases from a wide range of fields including library and archival studies, literary studies, art history, media studies, sound studies, folklore studies, game studies, and education. *Collection Thinking* builds on the important scholarly works produced on the topic of the archive over the past two decades and contributes to ongoing debates on the historical status of memory institutions. The volume illustrates how the concept of collection bridges these institutional and structural categories and generates discussions of cultural activities involving artifactual arrangement, preservation, curation, and circulation in both the private and the public spheres. Edited and introduced collaboratively by three senior scholars with expertise in the fields of literature, art history, archives, and museums. *Collection Thinking* is designed to stimulate interdisciplinary reflection and conversation. This book will be of interest to scholars and practitioners interested in how we organize materials for research across disciplines of the humanities and social sciences. With case studies that range from collecting Barbie dolls to medieval embroideries and with contributions from practitioners on record collecting, the creation of sub culture archives, and collection as artistic practice, this volume will appeal to anyone who has ever wondered about why and how collections are made.

Memes in Frame-Semantic Perspective Niels Brause, 2017-03-07 Bachelor Thesis from the year 2016 in the subject English Language and Literature Studies Linguistics grade 1.3 University of Duisburg Essen Department of Anglophone Studies language English abstract One cannot escape them because they are everywhere There is scarcely a day without one coming across them They are a humorous picture a witty message or a funny video you find on the internet They are in our newsfeed on our message boards or in personal messages from our friends These sources of entertainment seem to be by now an important element of today's web society and there is a huge number of image boards like 9gag.com or reddit.com which have no other purpose than satisfying our needs for these sources of entertainment Even a growing number of newspapers have started to include this type of content in their online platforms A term that is often used to describe this accumulation of different visual entities is the term memes but this term is vague and ambiguous and it does not specifically say what kind of phenomena are included in it This bachelor thesis is an attempt to establish these phenomena labelled as memes as valuable objects for linguistic studies It will glance at several linguistic theories and check their relevance for analysing image macros as representatives for memes in general Finally it will analyse image macros by using the frame semantic framework thus integrating the former accomplished insights in one theoretic framework with only a few central terms This will support the thesis that frame semantics is capable of describing the patterns of encyclopaedic knowledge needed in order to understand complex bimodal entities *Vanity Fair*, 2016 Statement, 2012
