**Monetary House of Cards** Henrik Zeberg, 2025-10-31 For more than a decade central banks have engineered the greatest financial bubble in history By driving interest rates to the floor and unleashing unprecedented liquidity they built an Everything Bubble spanning stocks housing bonds and crypto an edifice of excess now standing on shaky ground In this book Henrik Zeberg introduces his Zeberg Business Cycle Model a real time framework that cuts through the noise of conventional forecasting The model shows that we are standing at a historic peak in both markets and the global economy just before the cycle turns down Through vivid historical parallels from Tulip Mania to the Dot Com boom combined with hard data and cycle analysis Zeberg demonstrates why the current euphoria is destined to end the same way in collapse The Monetary House of Cards is both a warning and a guide a roadmap for understanding how the bubble was built why it will burst and how investors and citizens can prepare for the turmoil ahead Memonomics Said Dawlabani, 2013-09 The term

**Fixed** John Y. Campbell, Tarun Ramadorai, 2025-10-21 Two leading economists reveal why today's personal finance markets are rigged against us and offer practical steps to fix them We interact with the financial system every day whether taking out or paying off loans making insurance claims or simply depositing money into our bank accounts Fixed exposes how this system has been corrupted to serve the interests of financial services providers and their cleverest customers at the expense of ordinary people John Campbell and Tarun Ramadorai diagnose the ills of today's personal finance markets in the United States and across the globe looking at everything from short term saving and borrowing to loans for education and housing financial products for retirement and insurance They show how the system is fixed to benefit those who are wealthy and more educated while encouraging financial mistakes by those who are not making it difficult for regular consumers to make sound financial decisions and disadvantaging them in some of the most consequential economic transactions of their lives Campbell and Ramadorai describe how some even opt out of the financial system altogether relying on unregulated and often shady mechanisms to implement necessary financial functions with dire consequences for individuals families and the economy more broadly With the explosive growth of the global middle class longer lifespans and greater numbers of seniors managing their money alone the pitfalls of personal finance now affect billions of people around the world Fixed proposes concrete solutions that harness the expertise of economists the power of government and the speed of technology to restore fairness and trust in our broken system and make it work better for ordinary people Consumer Prices and Price Indexes Statistics Canada.
