The Taking and Displaying of Human Body Parts as Trophies by Amerindians Richard J. Chacon,David H. Dye,2007-08-21 This edited volume mainly focuses on the practice of taking and displaying various body parts as trophies in both North and South America The editors and contributors which include Native Peoples from both continents examine the evidence and causes of Amerindian trophy

taking Additionally they present objectively and discuss dispassionately the topic of human proclivity toward ritual violence This book fills the gap in literature on this subject **Jahrbuch des Linden-Museums** ,1984 *World Military History Bibliography* Barton Hacker,2003-06-01 Preclassical and indigenous nonwestern military institutions and methods of warfare are the chief subjects of this annotated bibliography of work published 1967 1997 Classical antiquity post Roman Europe and the westernized armed forces of the 20th century although covered receive less systematic attention Emphasis is on historical studies of military organization and the relationships between military and other social institutions rather than wars and battles Especially rich in references to the periodical literature the bibliography is divided into eight parts 1 general and comparative topics 2 the ancient world 3 Eurasia since antiquity 4 sub Saharan Africa and Oceania 5 pre Columbian America 6 postcontact America 7 the contemporary nonwestern world and 8 philosophical social scientific natural scientific and other works not primarily historical Ride of the Second Horseman Robert L. O'Connell,1997-10-23 Accurst be he that first invented war wrote Christopher Marlowe a declaration that most of us would take as a literary not literal construction But in this sweeping overview of the rise of civilization Robert O Connell finds that war is indeed an invention an institution that arose due to very specific historical circumstances an institution that now verges on extinction In Ride of the Second Horseman O Connell probes the distant human past to show how and why war arose He begins with a definition that distinguishes between war and mere feuding war involves group rather than individual issues political or economic goals and direction by some governmental structure carried out with the intention of lasting results With this definition he finds that ants are the only other creatures that conduct it battling other colonies for territory and slaves But ants unlike humans are driven by their genes in humans changes in our culture and subsistence patterns not our genetic hardware brought the rise of organized warfare O Connell draws on anthropology and archeology to locate the rise of war sometime after the human transition from nomadic hunting and gathering to agriculture when society split between farmers and pastoralists Around 5500 BC these pastoralists initiated the birth of war with raids on Middle Eastern agricultural settlements The farmers responded by ringing their villages with walls setting off a process of further social development intensified combat and ultimately the rise of complex urban societies dependent upon warfare to help stabilize what amounted to highly volatile population structures beset by frequent bouts of famine and epidemic disease In times of overpopulation the armies either conquered new lands or self destructed leaving fewer mouths to feed In times of underpopulation slaves were taken to provide labor O Connell explores the histories of the civilizations of ancient Sumeria Egypt Assyria China and the New World showing how war came to each and how it adapted to varying circumstances On the other hand societies based on trade employed war much more selectively and pragmatically Thus Minoan Crete long protected from marauding pastoralists developed a wealthy mercantile society marked by unmilitaristic attitudes equality between men and women and a relative absence of class distinctions In Assyria by contrast war came to be an end in itself in a culture dominated by male warriors

Despite the violence in the world today O Connell finds reason for hope The industrial revolution broke the old patterns of subsistence war no longer serves the demographic purpose it once did Fascinating and provocative Ride of the Second Horseman offers a far reaching tour of human history that suggests the age old cycle of war may now be near its end
