*Parapsychology* Jesse Hong Xiong, 2009-11-09 This is a work of systematic parapsychology The book aims to construct a framework and system of parapsychology taking a comprehensive approach to the field The Outline of Parapsychology states that parapsychology has a different philosophical background from the existing science and religions and posits that pantheism could be the theoretical basis of parapsychology The book also integrates parapsychology with oriental philosophies and New Age movement thought

*Psychology* Henry L. Roediger, 1996 This is an upper level introductory psychology text that incorporates cutting edge material to present the core aspects of psychology The authors use a set of five themes that are woven throughout the text to unite all of the material These primary themes or emphases introduced in Chapter 1 include biological learning cognitive developmental and sociocultural factors Then in each succeeding chapter the themes are introduced at the beginning of the chapter in a set of Thematic Questions woven into the chapter material and summarized at the end in Themes in Review New features have been added to this edition to create a more exciting and visually enhanced text

**Psi Wars** James E. Alcock, Jean E. Burns, Anthony Freeman, 2003 At the heart of the parapsychology psi battle are two types of phenomena extra sensory perception and psychokinesis Neither effect can be explained by ordinary science so parapsychologists with evidence that they are real are accused of bad science or bad faith or both

Expanding Circle Morality Janice L. Templeton, 2006 This dissertation explored the concept of extending moral concern to all life from both theoretical and empirical perspectives In the theoretical chapter I defined expanding circle morality ECM as a dynamic lifelong sustainable commitment to expand

our circle of caring to include all sentient beings as a core guiding principle in life and reviewed the existing psychological literature that addressed this concept Next in three datasets I identified proxy measures for ECM and tested the hypothesis that higher levels of ECM are associated with higher levels of individual well being and greater concern for others than lower levels of ECM In addition I tested the hypothesis that individuals volunteering frequently would have greater well being when they had high but not low levels of ECM Finally in an experimental study I tested the hypothesis that loving kindness meditation i e a spiritual practice to broaden one s circle of caring would reduce judgment of moral transgressors especially when those individuals were exposed to death awareness as described by Terror Management Theory Data for the first three studies were drawn from two large longitudinal studies of child and adolescent development and one longitudinal study of adult women ANOVA analyses largely supported the predictions Proxy measures of ECM included spiritual importance an implicit measure of social and civic concern and a measure of social responsibility motivation Higher scores on each of these three measures were associated with better individual well being as well as greater concern for the well being of others In addition individuals with higher levels of ECM reported greater well being when volunteering frequently than individuals with low levels of ECM In the final experimental study loving kindness meditation participants reported more positive emotion and specifically more compassion than participants in the control condition i e a progressive relaxation exercise Although the means trended in the predicted direction participants in the loving kindness and death salience condition did not judge moral transgressors less harshly The possibility that increased compassion does not necessarily result in increased tolerance of behaviors that harm others is discussed In sum ECM is associated with individual well being and the well being of an expanded circle of others

**Critical Thinking in Psychology** D. Alan Bensley, 1998 Are people basically selfish Can psychotherapists help people recover memories of sexual abuse that they have not recalled for decades Can the moon cause people to go crazy or commit crimes What do we actually know about the world through our senses These are but a few of the fascinating questions that are addressed in D Alan Bensley s engaging new book *Critical Thinking in Psychology* A Unified Schools Approach With each question illustrating the need for critical thinking Bensley piques student interest and inspires them to

think more effectively and critically about both the common and uncommon Without telling readers what to think Bensley helps them learn how to think critically about the issues often raised in psychology And while obtaining answers to the above questions is important Bensley shows readers how the process of drawing sound conclusions to these queries is even more important     Seeing Myself Susan Blackmore, 2017-07-06 Essential reading for anyone seeking to understand their own mind and to find a spiritual path that is compatible with science As an impressionable young student Susan Blackmore had an intense dramatic and life changing experience seeming to leave her body and travel the world With no rational explanation for her out of body experience OBE she turned to astral projection and the paranormal but soon despaired of finding answers Decades later a Swiss neurosurgeon accidentally discovered the spot in the brain that can induce OBEs and everything changed this crucial spot is part of the brain's self system and when disturbed so is our experience of self Blackmore leaped back into OBE research and at last began to unravel what had happened to her Seeing Myself describes her long quest for answers through spirituality religion drugs meditation philosophy and neuroscience Anyone can have an OBE indeed 15 per cent of us have Even more have experienced sleep paralysis lucid dreaming and the creepy sense of an invisible presence At last with the advent of brain stimulation fMRI scanning and virtual reality all these phenomena are beginning to make sense Long relegated to the very fringes of research the new science of out of body experiences is now contributing to our understanding of consciousness and our very selves     Filosofskie issledovaniia , 1996

**matlab code to detect and count vehicles in images** - Jan 31 2023

web aug 20 2013 matlab code to detect and count vehicles in learn more about vehicle recognition shape recognition pattern recognition pattern count computer vision toolbox deep learning toolbox hello everyone i am new to matlab and image processing i am working on a traffic emulation project in witch i need to detect and count the number of

generate code for vision vehicle detector matlab simulink - Jul 05 2023

web the reference model implements the vehicle detection algorithm and generates c code for the acf vehicle detector and cuda code for the yolov2 vehicle detector this reference model can be integrated with closed loop systems such as highway lane following system

**detecting cars in a video of traffic matlab simulink** - May 03 2023

web this example uses videoreader matlab implay and other image processing toolbox functions to detect light colored cars in a video of traffic note that videoreader has platform specific capabilities and may not be able to read the supplied motion jpeg2000 video on some platforms

**vehicle detection using image processing ieee xplore** - Apr 21 2022

web nov 8 2020 taking its importance into consideration an efficient algorithm is proposed to detect vehicles in an image using image processing the image is captured from the front view of the vehicles so this algorithm detects vehicles using the front view each vehicle is detected based on its size
