Critical Questions in STEM Education Valarie L. Akerson, Gayle A. Buck, 2020-11-05 This edited volume offers a crosscutting view of STEM and is comprised of work by scholars in science technology engineering and mathematics education It offers a view of STEM from the disciplines that comprise it while adhering to the idea that STEM itself is an interdisciplinary treatment of all the associated disciplines in a meaningful way This book raises and answers questions regarding the meaning of STEM education and research This volume is divided into three sections the first one describes the nature of the component disciplines of STEM The next section presents work from leaders representing all STEM disciplines and deals with aspects such as K 12 and post secondary education The last section draws conclusions regarding the natures of the disciplines challenges and advantages of STEM education in terms of theoretical and practical implications The two final chapters compile arguments from the research chapters describing themes in research results and making recommendations for best STEM education practice and examining areas for future research in STEM education

Executing Crisis Jo Robertson, 2019-11-07 Business leaders would be better served by understanding key crisis concepts and applying them to their own situation rather than relying on crisis advisors to swoop in to take care of a problem once it has become a crisis Loaded with Case Studies How leaders deal with crisis can clarify character and strengthen reputation On the other hand the wrong words and actions from the C Suite can worsen the crisis spiral Crisis management does not begin on the day the fire erupts the hurricane barrels through or the accident happens Dr Jo Robertson a leading expert in heading off and containing crisis lays out the key concepts that business leaders need to apply to their own organizations so they don't have to rely on outside crisis advisors to swoop in and save the day **Biohacked** Brandon J.

Weichert, 2023-05-16 When COVID 19 erupted from Wuhan China under mysterious circumstances the Communist Party of China covered up its existence for as long as possible It is now apparent that there is more to COVID than what the authorities wish for us to know Biohacked China's Race to Control Life details the decades long pursuit by the Chinese Communists to dominate the biotechnology industry to control the very building blocks of life on Earth to further their political control at home and their supremacy abroad More appalling than the egregious cover up that China's rulers engaged in with COVID 19 is the fact that Western scientists pharmaceutical companies and research labs have contributed to China's rapid and dangerous growth in the biotech industry so much so that China not the United States may become the seat of the biotechnology industry The Chinese leadership believes that biotechnology is a critical industry for the Communist Party to achieve its China Dream of becoming the world's dominant superpower by 2049 In China's biotech sector truly macabre practices are being developed from ambitious cloning programs to the creation of potential pathogens that China's military plans to use in specific genetic attacks against Beijing's growing list of political enemies To stop the threat author Brandon J Weichert proposes the world's nations create a comprehensive set of treaties for regulating biotechnology

research and development Further Weichert calls for Washington to slow the transfer of advanced biotechnology knowledge and funding from the United States to China using means like the Foreign Corrupt Practices Act and the Committee on Foreign Investment in the United States CFIUS Unless an all of government and society approach is taken to curbing irresponsible biotech development in China then another deadlier COVID 19 like pandemic could be at hand

Food Chemistry in Small Bites Patricia B O'Hara, 2025-04-15 Food Chemistry in Small Bites takes readers on an up close scientific journey through the transformation of food when meals are prepared Organized in bite size digestible units this innovative text introduces students to food s molecular makeup as well as the perception of food by the five senses Using familiar foods as examples it explores what happens to ingredients when heated cooled or treated and also considers what happens when materials that don t naturally mix are forced to do so With informative full color renderings and a hands on lab section the book encourages students to think like scientists while preparing delicious dishes Readers will formulate hypotheses as to why certain foods taste hot despite being at room temperature why milk separates into curds and whey when lemon is added and other ordinary but chemically complex phenomena This book also importantly challenges readers to think critically about the future of food in the face of a warming planet
