Ai Tools This Month Returns:

Applications of AI and Machine Learning in Finance and Economics Alessia Paccagnini, Maria Iannario, Joerg Osterrieder, Adamaria Perrotta, Fabio Parla, Hanna Kristín Skaftadóttir, 2025-11-19 This Research Topic is in collaboration with the Women in FinTech and AI 2024 conference. Extended versions of work presented at the conference are welcome. In today's rapidly evolving economic landscape, the integration of artificial intelligence (AI) in finance and economics has become paramount. AI, fueled by unprecedented computational power and sophisticated algorithms, has the potential to revolutionize decision-making processes, risk management, and predictive analytics within the financial sector. Its adaptive capabilities and data-driven insights contribute to more informed strategies, driving efficiency and innovation. Moreover, the era of big data has ushered in a new paradigm where vast and diverse datasets serve as a cornerstone for informed decision-making. The intersection of big data and finance allows for a granular understanding of market dynamics, customer behavior, and economic trends. Harnessing the power of big data alongside AI not only empowers financial institutions to navigate complexities but also lays the foundation for sustainable and resilient financial systems in an interconnected global economy. We invite researchers and professionals to contribute to a special issue of *Frontiers in Artificial Intelligence* dedicated to the intersection of artificial intelligence and economics and finance. This special issue aims to explore cutting-edge advancements in various areas, including but not limited to: Big Data applied to finance, natural language processing in economics, digital finance, and sustainability; AI for financial markets and blockchain applications. We welcome submissions on a wide range of topics, including: Big Data applications in finance and economics; Natural language processing in economic and financial contexts; Digital finance and its implications for sustainability; Artificial intelligence in financial markets; Blockchain applications in finance; Artificial intelligence for peer-to-peer finance; Network analysis in finance; Artificial intelligence in Green Finance and Climate Change; Behavioral finance. *Reimagining Tax and Advisory Services: Intelligent Systems, Security, and Data-Driven Decision Making* Pallav Kumar Kaulwar, 2025-05-07 The tax and advisory landscape is undergoing a profound transformation. Rapid advancements in artificial intelligence (AI), data analytics, and cybersecurity are redefining how professionals deliver value in an increasingly complex regulatory and financial environment. This book, *Reimagining Tax and Advisory Services: Intelligent Systems, Security, and Data-Driven Decision Making*, explores how digital intelligence is reshaping the traditional roles of tax advisors, auditors, and financial consultants. As regulatory frameworks evolve and businesses demand faster, more accurate insights, the need for real-time, data-driven decision-making has never been greater. Intelligent systems powered by AI, machine learning, and robotic process automation are now capable of analyzing vast datasets, interpreting tax laws, and offering predictive insights with a speed and precision that far surpass human capabilities. These technologies are not just enhancing productivity; they are reimagining the core functions of tax and advisory services. This book takes a multidimensional approach to understanding this shift. It explores how secure, intelligent platforms are

enabling seamless compliance fraud detection and strategic financial planning It also examines how cybersecurity data governance and ethical AI are essential pillars in building client trust and maintaining the integrity of advisory services in a digital first world From intelligent tax engines to automated audit trails and from AI powered client advisory portals to integrated DevSecOps practices we present a future ready blueprint for firms looking to thrive in the age of digital finance Real world use cases emerging trends and actionable frameworks offer both strategic guidance and practical tools for professionals navigating this complex transition Whether you are a tax consultant financial advisor IT architect or decision maker in a professional services firm this book offers a timely lens into the technologies and principles driving innovation in the sector Our aim is not just to inform but to inspire a reinvention of tax and advisory services for the intelligent secure and data driven era ahead

Building Conversational Generative AI Apps with Langchain and GPT: Develop

End-to-End LLM-powered Conversational AI Apps with Python, LangChain, GPT and Google Colab Mugesh

S.,2025-06-04 Transform Text into Intelligent Conversations with LangChain and GPT Key Features Build AI Chatbots with LangChain Python and GPT models through hands on guidance Master Advanced Techniques like RAG document embedding and LLM fine tuning Deploy and Scale conversational AI systems for real world applications Book DescriptionConversational AI Apps are revolutionizing the way we interact with technology enabling businesses and developers to create smarter more intuitive applications that engage users in natural meaningful ways Building Conversational Generative AI Apps with LangChain and GPT is your ultimate guide to mastering AI driven conversational systems Starting with core concepts of generative AI and LLMs you ll learn to build intelligent chatbots and virtual assistants while exploring techniques like fine tuning LLMs retrieval augmented generation RAG and document embedding As you progress you ll dive deeper into advanced topics such as vector databases and multimodal capabilities enabling you to create highly accurate context aware AI agents The book s step by step tutorials ensure that you develop practical skills in deploying and optimizing scalable conversational AI solutions By the end you ll be equipped to build AI apps that enhance customer engagement automate workflows and scale seamlessly Unlock the potential of Building Conversational Generative AI Apps with LangChain and GPT and create next gen AI applications today What you will learn Build and deploy AI driven chatbots using LangChain and GPT models Implement advanced techniques like retrieval augmented generation RAG for smarter responses Fine tune LLMs for domain specific conversational AI applications Leverage vector databases for efficient knowledge retrieval and enhanced chatbot performance Explore multimodal capabilities and document embedding for better context aware responses Optimize and scale conversational AI systems for large scale deployments

The ART of POWER: Georgetta Robinson,2025-02-12
