auch im Bereich der paläografischen Schriftanalyse einsetzen. Dieser Frage soll innerhalb dieser Arbeit am Beispiel eines ausgewählten Fragmentes auf den Grund gegangen werden. Im Mittelpunkt der Arbeit steht das Fragment K15 017 aus der Universitäts- und Landesbibliothek Düsseldorf, welches der Schriftheimat Northumbria zugehörig und auf das 9. Jahrhundert datiert ist. Geschrieben in insularer Minuskel dient das Fragment dazu, die Fähigkeiten künstlicher Intelligenz in der Paläografie zu testen. Ziel ist es zu analysieren, wie präzise eine KI Schriftart, Entstehungszeit und Ort des Fragments bestimmen kann. Hierfür wird eine detaillierte mehrstufige Analyse mittels des KI-Tools ChatGPT Version 4.0 durchgeführt. Die Hausarbeit konzentriert sich auf den Vergleich des Fragments mit Handschriften gleicher Schriftart, Herkunft und Datierung aus dem 9. Jahrhundert, um eine präzise Bewertung zu ermöglichen. Durch die Festlegung auf dieses Fragment wird ein qualitativ gutes Digitalisat untersucht, sodass keine Aussage über die Leistung der KI bei unleserlichen Handschriften getroffen werden kann.

*Misbelief* Dan Ariely, 2023-09-19 In this thoughtful moving and well written book Dan Ariely narrates his personal and professional journey to understand the world of misbelievers and conspiracy theories and offers insights and tips that will hopefully help all of us protect our fragile social fabric from being torn apart by disinformation and distrust. Yuval Harari, bestselling author of *Sapiens*. *Misbelief* is an urgent examination of the human attraction to misinformation. This timely book can provide a crucial foundation for building a more empathetic and informed society. Daniel H. Pink, 1. New York Times bestselling author of *The Power of Regret*. The renowned social scientist, professor and bestselling author of *Predictably Irrational* delivers his most urgent and compelling book: an eye-opening exploration of the human side of the misinformation crisis, examining what drives otherwise rational people to adopt deeply irrational beliefs. Misinformation affects all of us on a daily basis, from social media to larger political challenges, from casual conversations in supermarkets to even our closest relationships. While we recognize the dangers that misinformation poses, the problem is complex, far beyond what policing social media alone can achieve, and too often our limited solutions are shaped by partisan politics and individual interpretations of truth. In *Misbelief*, preeminent social scientist Dan Ariely argues that to understand the irrational appeal of misinformation, we must first understand the behavior of misbelief: the psychological and social journey that leads people to mistrust accepted truths, entertain alternative facts, and even embrace full-blown conspiracy theories. Misinformation, it turns out, appeals to something innate in all of us, on the right and the left, and it is only by understanding this psychology that we can blunt its effects. Grounded in years of study as well as Ariely's own experience as a target of disinformation, *Misbelief* is an eye-opening and comprehensive analysis of the psychological drivers that cause otherwise rational people to adopt deeply irrational beliefs. Utilizing the latest research, Ariely reveals the key elements: emotional, cognitive, personality and social, that drive people down the funnel of false information and mistrust, showing how, under the right circumstances, anyone can become a misbeliever. Yet Ariely also offers hope. Even as advanced artificial intelligence has become capable of generating convincing fake news stories at an unprecedented scale, he shows that awareness of these forces fueling misbelief makes us as

individuals and as a society more resilient to its allure Combating misbelief requires a strategy rooted not in conflict but in empathy The sooner we recognize that misbelief is above all else a human problem the sooner we can become the solution ourselves
