David A. Kessler, MD,2025-05-29 INSTANT NEW YORK TIMES BESTSELLER An important and illuminating book Chris van Tulleken author of *Ultra Processed People* For decades the medical establishment has been giving us the wrong advice on what to eat and when we put on weight we are made to feel it s our own fault In *Diet Drugs and Dopamine* Dr David A Kessler a leading medic and former head of the US Food and Drug Administration sets the record straight sharing new evidence that obesity is not just a disease of the body but also one of the brain He explains how processed food has changed our brain chemistry creating compulsive cravings that not only cause us to eat more but rob us of the ability to feel full As someone who has struggled with his weight all his adult life Dr Kessler trials the latest weight loss drugs and brings his unique perspective to evaluate their real impact While these medicines which work by suppressing appetite will offer miracle results for some they are not a cure all Drawing on cutting edge research on the many factors that influence weight from neuroscience to nutrition Kessler presents a new way forward Eye opening and empowering this book is a must read for anyone who has ever struggled to maintain a healthy body weight which is to say everyone Nourishment Fred Provenza,2018 Reflections on feeding body and spirit in a world of change Animal scientists have long considered domestic livestock to be too dumb to know how to eat right but the lifetime research of animal behaviorist Fred Provenza and his

colleagues has debunked this myth Their work shows that when given a choice of natural foods livestock have an astoundingly refined palate nibbling through the day on as many as fifty kinds of grasses forbs and shrubs to meet their nutritional needs with remarkable precision In Nourishment Provenza presents his thesis of the wisdom body a wisdom that links flavor feedback relationships at a cellular level with biochemically rich foods to meet the body s nutritional and medicinal needs Provenza explores the fascinating complexity of these relationships as he raises and answers thought provoking questions about what we can learn from animals about nutritional wisdom What kinds of memories form the basis for how herbivores and humans recognize foods Can a body develop nutritional and medicinal memories in utero and early in life Do humans still possess the wisdom to select nourishing diets Or has that ability been hijacked by nutritional authorities Consumers eager for a quick fix have empowered the multibillion dollar a year supplement industry but is taking supplements and enriching and fortifying foods helping us or is it hurting us On a broader scale Provenza explores the relationships among facets of complex poorly understood ever changing ecological social and economic systems in light of an unpredictable future To what degree do we lose contact with life sustaining energies when the foods we eat come from anywhere but where we live To what degree do we lose the mythological relationship that links us physically and spiritually with Mother Earth who nurtures our lives Provenza s paradigm changing exploration of these questions has implications that could vastly improve our health through a simple change in the way we view our relationships with the plants and animals we eat Our health could be improved by eating biochemically rich foods and by creating cultures that know how to combine foods into meals that nourish and satiate Provenza contends the voices of authority disconnect most people from a personal search to discover the inner wisdom that can nourish body and spirit That journey means embracing wonder and uncertainty and avoiding illusions of stability and control as we dine on a planet in a universe bent on consuming itself
