Gasotransmitters in Plants Lorenzo Lamattina, Carlos García-Mata, 2016-09-01 This book describes the three gasotransmitters nitric oxide NO hydrogen sulphide H₂S and carbon monoxide CO and their function as intracellular signalling molecules in plants Common properties are shared by NO H₂S and CO they are beneficial at low concentrations but hazardous in higher amounts they are small molecules of gas they can freely cross cell membranes their effects do not rely on receptors they are generated enzymatically and their production is regulated their functions can be mimicked by exogenous application and their cellular effects may or may not be mediated by second messengers but have specific cellular and molecular targets In plants many aspects of the biology of gasotransmitters remain completely unknown and generate intriguing questions which will be discussed in this book

Feed Efficiency in the Beef Industry Rodney A. Hill, 2012-06-18 Feed Efficiency in the Beef Industry provides a thorough and concise overview of feed efficiency in beef cattle It frames the great importance of feed efficiency to the industry and details the latest findings of the many scientific disciplines that intersect and aim to improve efficient and sustainable production of nutritious beef The vast majority of production costs are directly tied to feed With increased demand for grains to feed a rapidly increasing world population and to supply a new demand for alternative fuels feed costs continue to increase In recent years the negative environmental impacts of inefficient feeding have also been realized as such feed efficiency is an important factor in both economic viability and environmental sustainability of cattle production Feed Efficiency in the Beef Industry covers a broad range of topics ranging from economic evaluation of feed efficiency to the physiological and genetic bases of efficient conversion of feed to high quality beef Chapters also look at how a fuller understanding of feed efficiency is leading to new selective breeding efforts to develop more efficient cattle With wide ranging coverage from leading international researchers Feed Efficiency will be a valuable resource for producers who wish to understand the complexities challenges and opportunities to reduce their cost of

production for students studying the topic and for researchers and professionals working in the beef industry Studies on Men's Health and Fertility Ashok Agarwal,Robert John Aitken,Juan G Alvarez,2012-03-17 Studies on Men s Health and Fertility provides a comprehensive series of up to the minute reviews addressing the role of oxidative stress in the aetiology of reproductive pathologies in the male This volume represents by far the most detailed authoritative review of the field that has been produced to date The text encompasses the basic science of reactive oxygen species ROS production by mammalian spermatozoa the way in which these highly reactive molecules are processed by the germ line and the physiological significance of this redox activity in the generation of a functional gamete The factors responsible for perturbing the delicate balance between physiological redox signaling on the one hand and oxidative stress on the other are also extensively reviewed and some of the first clues concerning the underlying mechanisms age heat infection cryostorage aberrant lipid metabolism clearly identified From a clinical perspective there are chapters setting out the methods we should be using to diagnose oxidative stress in the male germ line a clinical perspective on the aetiology of this condition and detailed considerations of the most suitable means of ameliorating such stress from a therapeutic point of view Studies on Men s Health and Fertility is intended to provide clinicians and scientists with a snap shot of the current status of this exciting rapidly moving field The book will be of value to clinicians interested in strategies for the management of oxidative stress in their infertility patients and scientists wishing to understand the molecular mechanisms underpinning the generation of ROS by these cells and its pathophysiological significance It was not so long ago that the ability of spermatozoa to generate ROS was a hotly disputed topic With the publication of this book such doubts can finally be laid to rest There is now no doubt that these cells actively generate ROS that oxidative stress is a major contributor to defects in male reproductive health and that the successful clinical management of this condition depends on developing a deeper understanding of the underlying molecular mechanisms In this quest Studies on Men s Health and Fertility will be seen as a clear and important milestone

Therapeutic Potentials of Curcumin for Alzheimer Disease Akhlaq A Farooqui,2016-03-05 This is the first book on the market that explores the importance of curcumin for the treatment of neurological disorders It has been estimated that 35 6 million people globally had dementia in 2010 and the prevalence of dementia has been predicted to double every 20 years Thus 115 4 million people may be living with dementia in 2050 Alzheimer s disease AD is the leading cause of dementia and is present in 60% 70% of people with dementia Unless new discoveries are made in the prevention or treatment of AD the number of cases in the US alone is estimated to increase threefold to 13 2 million by the year 2050 Thus it is important to focus on delaying and treating the onset of AD by curcumin may be an important step for controlling AD Regular consumption of healthy diet containing curcumin enriched foods moderate exercise and regular sleep may produce beneficial effects not only on motor and cognitive functions but also on memory deficits that occur to some extent during normal aging and to a large extent in AD Delaying the onset and progression of AD and improving its symptoms by few years with regular

consumption of curcumin may relieve some of the burden on health care systems In service of this goal this volume gives readers a comprehensive and cutting edge description of the importance of curcumin for the treatment of AD in cell culture and animal models in a manner that is useful not only to students and teachers but also to researchers dietitians nutritionists and physicians It can be used as supplement text for a range of neuroscience and nutrition courses Clinicians neuroscientists neurologists and pharmacologists will find this book useful for understanding molecular aspects of AD treatment by curcumin

Nitrite and Nitrate in Human Health and Disease AnnMarie Kocher,Joseph Loscalzo,2011-04-15 Nitrite and Nitrate in Human Health and Disease delivers a comprehensive review of nitrite and nitrate biology from basic biochemistry to the complex physiology and metabolism of these two naturally occurring molecules in the human body Well organized and well referenced chapters cover the rich history of nitrite and nitrate sources of exposure and the physiological effects when consumed through foods containing nitrite and nitrate The chapters are written by leading experts all of whom share their research and perspectives in order to help define the context for benefits vs any potential risks associated with nitrite and nitrate use either through dietary ingestion or therapeutic dosing This diverse collection of authors includes vascular biologists physiologists physicians epidemiologists cancer biologists registered dietitians chemists and public health experts from five countries in both academia and government Nitrite and Nitrate in Human Health and Disease provides a balanced view of nitric oxide biochemistry and nitrite and nitrate biochemistry in physiology and in the food sciences *Inflammation and Oxidative Stress in Neurological Disorders* Akhlaq A. Farooqui,2014-01-27 Unless new discoveries are made in the prevention or treatment of stroke Alzheimer s Disease and depression the number of patients with these diseases is sure to increase dramatically by the year 2050 Thus developing strategies to retard or delay the onset of stroke AD and depression these neurological disorders is of critical important The present monograph will provide current and comprehensive information on the relationship between neuroinflammation and oxidative stress in age related neurological disorders at the molecular level The information described in this monograph on lifestyle diet and exercise genes and age is intended to facilitate and promote new discoveries for the treatment of age related neurological disorders **Fishman's Pulmonary**
