Review Guide and Lecture Companion - National Version Thomas Cronin,2003-07 , Object-oriented Data Structures Using Java Nell B. Dale,Daniel T. Joyce,Chip Weems,2002 Data Structures in Java is a continuation of Nell Dale s best selling Introduction to Java and Software Design text Data Structures is designed for students who have already taken one semester of computer science and are able to take a problem of medium complexity write an algorithm to solve the problem code the algorithm in a programming language and demonstrate the correctness of their solution The focus is on teaching computer science principles with chapter concepts being reinforced by case studies The object oriented concepts of encapsulation inheritance and polymorphism are covered while the book remains centered on abstract data types

Introduction to Java and Software Design Nell B. Dale,Chip Weems,Mark R. Headington,2003 Introduction to Java and Software Design breaks the current paradigms for teaching Java and object oriented programming in a first year programming course The Dale author team has developed a unique way of teaching object oriented programming They foster sound object oriented design by teaching students how to brainstorm use filtering scenarios CRC cards and responsibility algorithms The authors also present functional design as a way of writing algorithms for the class responsibilities that are assigned in the object oriented design Click here for downloadable student files This book has been developed from the ground up to be a Java text rather than a Java translation of prior works The text uses real Java I O classes and treats event handling as a fundamental control structure that is introduced right from the beginning The authors carefully guide the student through the process of declaring a reference variable instantiating an object and assigning it to the variable Students will gradually develop a complete and comprehensive understanding of what an object is how it works and what constitutes a well designed class interface
