Social-Structural Determinants of Health Sofie Hass, Jessica R. Corno, Aida Wisecup, 2025-07-29 Today more than ever society
 is faced with the unequivocal question of developing a better understanding of the interconnectedness between social forces
 environmental experiences and the outcomes of mental and physical health and well being Post COVID 19 considerations
 have led to an unprecedented need to establish a more interdisciplinary understanding of the role that social construction
 has on health and illness and the diverse set of ways that our social world plays in the identification treatment and
 experience of various diseases and health related conditions Social life is intricately linked to quality of life variables related
 to health both mental and physical Thus we recognize the invaluable contribution to the field of medicine made by a
 comprehensive understanding of health wellness and social functioning as a byproduct of the study of the human body and
