Memes to Movements An Xiao Mina, 2019-01-08 A global exploration of internet memes as agents of pop culture politics protest and propaganda on and offline and how they will save or destroy us all Memes are the street art of the social web Using social media driven movements as her guide technologist and digital media scholar An Xiao Mina unpacks the mechanics of memes and how they operate to reinforce amplify and shape today's politics She finds that the silly stuff of meme culture the photo remixes the selfies the YouTube songs and the pun tastic hashtags are fundamentally intertwined with how we find and affirm one another direct attention to human rights and social justice issues build narratives and make culture Mina finds parallels for example between a photo of Black Lives Matter protestors in Ferguson Missouri raising their hands in a gesture of resistance and one from eight thousand miles away in Hong Kong of Umbrella Movement activists raising yellow umbrellas as they fight for voting rights She shows how a viral video of then presidential nominee Donald Trump laid the groundwork for pink pussyhats a meme come to life as the widely recognized symbol for the international Women's March Crucially Mina reveals how in parts of the world where public dissent is downright dangerous memes can belie contentious political opinions that would incur drastic consequences if expressed outright Activists in China evade censorship by critiquing their government with grass mud horse pictures online Meanwhile governments and hate groups are also beginning to utilize memes to spread propaganda xenophobia and misinformation Botnets and state sponsored agents spread them to confuse and distract internet communities On the long winding road from innocuous cat photos internet memes have become a central practice for political contention and civic engagement Memes to Movements unveils the transformative power of memes for better and for worse At a time when our movements are growing more complex and open ended when governments are learning to wield the internet as effectively as protestors Mina brings a fresh and sharply innovative take to the media discourse

The Meme Machine Susan J. Blackmore, 2000-03-16 Humans are extraordinary creatures with the unique ability among animals to imitate and so copy from one another ideas habits skills behaviours inventions songs and stories These are all memes a term first coined by Richard Dawkins in 1976 in his book *The Selfish Gene* Memes like genes are replicators and this enthralling book is an investigation of whether this link between genes and memes can lead to important discoveries about the nature of the inner self Confronting the deepest questions about our inner selves with all our emotions memories beliefs and decisions Susan Blackmore makes a compelling case for the theory that the inner self is merely an illusion created by the memes for the sake of replication

Cyberactivism on the Participatory Web Martha McCaughey, 2014-04-16 Cyberactivism already has a rich history but over the past decade the participatory web with its de centralized information media sharing portability storage capacity and user generated content has reshaped political and social change Cyberactivism on the Participatory Web examines the impact of these new technologies on political organizing and protest across the political spectrum from the Arab Spring to artists to far right groups Linking new

information and communication technologies to possibilities for solidarity and action as well as surveillance and control in a context of global capital flow war and environmental crisis the contributors to this volume provide nuanced analyses of the dramatic transformations in media citizenship and social movements taking place today

Annual Editions Karen L. Freiberg, 2001-11 This annually updated reader is a compilation of carefully selected articles from magazines newspapers and journals Topics covered include genetic and parental influences on development development during infancy and early childhood and many others This title is supported by Dushkin Online www.dushkin.com online a student Web site that provides study support and tools and links to related Web sites **Urban Legends** Nick Harding, 2005 To many urban tales are nothing more than stories told with the express aim of provoking a frisson of fear in the listener But is there something working at a deeper level In this book Nick Harding sets out to describe a host of urban legends suggesting that we should not dismiss them purely as nonsense **Waves of Change** Patrick Callioni, 2010 Written in the middle of a global economic crisis this book is about a better future Patrick Callioni identifies and describes the major waves of change that are coming our way over the next decade or so and then provides practical advice on what to do or avoid doing to benefit most or suffer least from what is to come He describes some of the problems with the present regime of regulation We are regulating to catch the motes of dust floating in the air rather than the beams that end up poking out the eyes of our financial markets and suggests regulation should focus on rewarding the good rather than punishing the bad He also analyzes some of the behavior that helped to create the Credit Crunch They took healthy debt mortgage debt that was likely to be repaid mixed it up with toxic debt mortgage debt not likely to be repaid and then sold the debt on as prime safe debt creating untold damage Then he presents the waves of change that are coming the challenges of new technologies the business opportunities opened by reactions to climate change and demographic changes as workers and managers are no longer predominantly baby boomers He also warns of future signs of impending financial setbacks that should be avoided A financial crisis will occur only when the fuel is there in the form of an investment bubble In his previous book *Compliance and Regulation in the Financial Services Industry* Patrick Callioni successfully predicted most of the course of the current economic downturn Over regulation is as dangerous as under regulation so he proposes the creation of a federated network of trust Throughout this exciting book he emphasizes the increasing importance of knowledge capital value that is not captured by existing accounting standards and in particular soft intangibles knowledge assets time assets motivational assets etc and he proposes guidance on their measurement and profitable management *Mind Shapes* Alan R. Kahn, Kris Austen Radcliffe, 2005-03-30 In our everyday encounters we are continuously challenged by people who think and respond in ways different from ourselves Each one of us pays attention to different aspects of life interprets experiences differently understands certain issues better than others communicates with differing styles and uses different criteria for judging and

believing others Parents of a family with several children are usually amazed by the diverse ways in which the children develop Managers are confounded by the unexpected misunderstandings among themselves and those they manage Educators find it difficult to account for the broad spectrum of students responses to a single course of study And in relationships one is often perplexed at the ways in which common everyday words are sometimes interpreted Those of us who study the ways in which people interact continue to marvel at the differences people bring to thinking and communicating For the past 20 years Dr Kahn has led a team of scientists in in depth studies of the different brain processes leading to the different types of information processing in people This research has developed tools which can measure how people reveal the structure of their thought processes in the flow of their communications This has enabled the team to develop a model that organizes cognitive structures according to a new paradigm one that explicitly shows the connections between cognition input and output This paradigm identifies sixteen different ways in which people process information and describes the underlying brain mechanisms which are responsible Further Mind Shapes presents how these differences developed through the stages of human evolution and the way they are expressed in the steps of modern child development Theory and practicum come together as Mind Shapes links physiology of information processing to behavior and shows how different people communicate learn and make decisions This model has been successfully applied to education management consumer communications and psychological counseling dimensions of life where understanding human behavior and motivation are critical to success Mind Shapes provides its readers with useful tools which were developed as a result of this experience
