Berns, 2020-04-09 An authoritative resource for the wealth management industry that bridges the gap between modern perspectives on asset allocation and practical implementation An advanced yet practical dive into the world of asset allocation Modern Asset Allocation for Wealth Management provides the knowledge financial advisors and their robo advisor counterparts need to

reclaim ownership of the asset allocation component of their fiduciary responsibility Wealth management practitioners are commonly taught the traditional mean variance approach in CFA and similar curricula a method with increasingly limited applicability given the evolution of investment products and our understanding of real world client preferences Additionally financial advisors and researchers typically receive little to no training on how to implement a robust asset allocation framework a conceptually simple yet practically very challenging task This timely book offers professional wealth managers and researchers an up to date and implementable toolset for managing client portfolios The information presented in this book far exceeds the basic models and heuristics most commonly used today presenting advances in asset allocation that have been isolated to academic and institutional portfolio management settings until now while simultaneously providing a clear framework that advisors can immediately deploy This rigorous manuscript covers all aspects of creating client portfolios setting client risk preferences deciding which assets to include in the portfolio mix forecasting future asset performance and running an optimization to set a final allocation An important resource for all wealth management fiduciaries this book enables readers to Implement a rigorous yet streamlined asset allocation framework that they can stand behind with conviction Deploy both neo classical and behavioral elements of client preferences to more accurately establish a client risk profile Incorporate client financial goals into the asset allocation process systematically and precisely with a simple balance sheet model Create a systematic framework for justifying which assets should be included in client portfolios Build capital market assumptions from historical data via a statistically sound and intuitive process Run optimization methods that respect complex client preferences and real world asset characteristics Modern Asset Allocation for Wealth Management is ideal for practicing financial advisors and researchers in both traditional and robo advisor settings as well as advanced undergraduate and graduate courses on asset allocation

Ultraviolet Light in Food Technology Tatiana Koutchma, Larry J. Forney, Carmen I. Moraru, 2009-03-06 The production of environmentally friendly sustainable chemical free food continues to challenge the food industry spurring on investigations into alternative food processing techniques that are more sophisticated and diverse than current practices Exploring one of these emerging solutions Ultraviolet Light in Food Technology Principles and Applications incorporates the fundamentals of continuous and pulsed UV light generation and propagation current food regulations recommendations for optimal UV reactor design selection and validation information on both commercially available and under development UV sources and the outlook for future food applications After reviewing essential terms definitions and current applications the book emphasizes the need to properly assess the physical and chemical properties in foods that influence the effectiveness of UV treatment and impact inactivation kinetics It also addresses the effects of UV processing on food quality before considering the engineering aspects of UV light treatment such as transport phenomena process calculations and continuous flow reactor geometries The book then describes the principles of validating UV reactors as well as the principles and applications of UV pulsed light including microbial inactivation in
