particularly Artificial intelligence (AI) for International Politics Malam Wasai,2023-09-18 Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda challenging geostrategic relations serving as a tool for diplomats and negotiators and creating new opportunities and concerns about protecting human rights Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis individual state and international State level analysis examines the foreign policy behavior of states in terms of state characteristics For example some scholars say that all democracies behave a certain way they don t fight with other democracies Artificial intelligence impact governance As AI

continues to evolve and permeate various aspects of our lives its implications for AI and how does it impact businesses AI artificial intelligence refers to machines that can perceive intelligence synthesize and infer information It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect improve themselves based AI is designed to significantly enhance human capabilities and contributions making it a valuable business asset

Four Days a Week Juliet Schor, 2025-06-03 Bestselling author leading sociologist and economist Juliet Schor makes the case for a four day work week persuasively showing how this model can address major challenges such as burnout AI and the climate crisis and how employees companies and governments can work together to make it a reality Around the world long hours and intense pressure are taking their toll When the pandemic hit in 2020 work induced stress and burnout skyrocketed Many reached a breaking point Now three quarters of the world s employees are disengaged and struggling including in the US and Canada where half are experiencing high levels of daily stress Our current work culture the five day forty hours a week model which has gone unchanged for nearly a century is failing But a remedial countertrend has emerged the four day work week Kickstarter Bolt Basecamp ThredUp and hundreds of other employers have eliminated the fifth day of work successfully figuring out how to maintain productivity while seeing remarkable improvements in employee well being Hiring is easier and fewer people are quitting These results are global Working a four day week people feel energized capable and more optimistic about their lives and their jobs Four Days a Week is the first large scale study of this trend Juliet Schor an expert who has researched and written about work for more than four decades beginning with her New York Times bestseller *The Overworked American* in 1992 shares her pioneering analysis of the benefits of a shorter work week how companies can achieve them why the concept has taken so long to emerge and gain acceptance and why doing so will help a company s employees and its bottom line The book is a blueprint for implementing a change that once seemed radical but is now within reach

Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change

represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover Inteligencia artificial: la revolución que cambiará todo Álvaro
