Vol 1 und Vol 2. Wolfgang Runge, 2014-07-03 The treatise is the first coherent and comprehensive presentation of the important sub field of technology entrepreneurship emphasizing the science and engineering perspectives It is a presentation of technology entrepreneurship as an inter cultural approach referring to the US and Germany It integrates micro and macro aspects referring to numerous cases of firms foundations The book provides also a new semi quantitative approach to growth of new technology ventures **Planting an Idea** Jerry Apps, Natasha Kassulke, 2023-04-18 A first of its kind handbook allowing the reader to combine the processes of critical and creative thinking with a detailed discussion of the environmental challenges facing our planet Planting an Idea is part guidebook for better critical and creative thinking and part overview of the environmental challenges that face our planet today It is designed to help readers young and old examine and develop opinions on a variety of environmental issues based on substance creativity and fact Apps and Kassulke take the reader through an examination of critical and creative thinking providing a foundation for these skills a foundation that can be used in all matter of public discourse They then provide a brief history of the environmental movement followed by a deep exploration of various environmental issues ranging from climate change to land use to clean air and water In each section Apps and Kassulke show how the processes of critical and creative thinking can be used to evaluate the issues and define potential actions and solutions Inside a wide variety of topics are covered including Agriculture Endangered Species Land Use Air Quality And lots more This book allows readers to better understand their positions developing the tools they need to provide evidence that is accurate and reliable and to consider

other perspectives along the way An essential read for anyone interested in protecting the environment Planting an Idea will enable readers to unlock ways to navigate some of today s most pressing and important challenges **Advances in Automation, Signal Processing, Instrumentation, and Control** Venkata Lakshmi Narayana Komanapalli,N. Sivakumaran,Santoshkumar Hampannavar,2021-03-04 This book presents the select proceedings of the International Conference on Automation Signal Processing Instrumentation and Control i CASIC 2020 The book mainly focuses on emerging technologies in electrical systems IoT based instrumentation advanced industrial automation and advanced image and signal processing It also includes studies on the analysis design and implementation of instrumentation systems and high accuracy and energy efficient controllers The contents of this book will be useful for beginners researchers as well as professionals interested in instrumentation and control and other allied fields Bioinspired Strategic Design Daniel J. Finkenstadt,Tojin T. Eapen,2024-07-08 Organizations are commonly thrust into hostile operating environments where they are required to make strategic decisions that involve significant and costly tradeoffs Such hostile environments may be endemic such as an economic recession or idiosyncratic such as a predatory action by an adversary Many features of such hostile environments parallel those of living organisms that also demonstrate fine tuned strategies to improve their survivability under adverse conditions How can organizations use these bioinspired strategies to survive and even potentially innovate This book shows that the same three capabilities essential for the survival of living organisms in harsh environments efficiency resilience and prominence are also critical for organizations in their process of navigating through their own hostile environments Throughout the book the authors provide organizational executives with a systematic framework for thinking about strategic decision making in a hostile environment leaning on analysis of real world cases to draw out ontologies and methods for guiding their teams through disruptions change management innovation and process improvements In the first part organizations are provided with a systematic approach to analyzing three survivability influences forces resources and observers and their interrelationships While all three influences are active across all organisms and organizations the exact nature of their interrelationship and the significance of each influence are unique to every organism or organization The framework helps organizations nail down the specific features of their operating environment that can help or hinder survivability by analyzing the three influences Organizations can respond to external influences by developing three pronged capabilities efficiency resilience and prominence ERP that respond to the three survivability influences Organizations often struggle with identifying the appropriate strategies to apply under different conditions Fortunately nature provides several mechanisms that can be analogically applied to guide business strategies The book contains many illustrations and examples of strategic principles observed among living organisms that can help an organization develop ERP capability Finally the book introduces seven strategic design heuristics Combination Elimination Separation Segmentation Replication Dynamics and Maximization observed in a living system that can be flexibly utilized to

Technology and Sustainable Development Henrik Skaug Sætra,2023-04-14 Technological change is at the core of all major disruptions in human history and revolutions wars and general development are regularly connected to some sort of technological change However not all development is beneficial While technology has fueled great innovations and rapid development the notion of sustainable development has gained prominence as we now experience serious social economic and environmental challenges This book examines whether technology can be used to fix the very problems caused by technology as the various chapters examine different aspects related to how technology has brought us where we are today which some will say is the best place humanity s been at according to a range of metrics and whether technology helps or hinders us in our efforts to solve the challenges we currently face The issues discussed cover the three sustainability dimensions and include topics such as the materiality of AI technology in education AI for gender equality innovation and the digital divide and how technology relates to power the political system and capitalism The chapters all build on the theoretical backdrop of technological change sustainable development and the UN s Sustainable Development Goals are actively used throughout this book both to examine how these goals capture or overlook central elements of sustainable development and also to facilitate and create a common framework of engagement between the chapters This book provides a novel combination of traditional theories that are explored through different case studies providing the ground for a better understanding of how and when technology can and cannot be the enabler of sustainable development It is thus an important resource for students of all disciplines technologists and those developing and applying new technologies It is also a valuable resource for politicians and regulators attempting to harness the power of technology for good while limiting its negative potential The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Funded by stfold University College
