Environmental Geography Leslie A. Duram, 2018-10-01 Explores the complex relationship humans have with the environment. It is one of both responsibility including the sustainable or unsustainable management of natural resources and emotion like the elation gleaned from a beautiful landscape or the devastation experienced from a natural disaster. Human induced damage to the environment has widespread consequences for Earth and its inhabitants that have already included sea level rise, increased wildlife extinctions, heatwaves, droughts, intensified air pollution, and water shortages. This book provides comprehensive coverage of the complex interactions between people and the environment. It presents three clear, honest and down to earth essays that cover the devastating impact humans have on the environment, the equally devastating impact the environment has on humans at times, and the positive impact that increasing awareness of our effect on the planet is having on the movement to create a more sustainable future. In addition, in depth entries on 60 key environmental geography terms such as deforestation, ecotourism, and environmental justice provide a deeper dive into the topic. 15 real world case studies on topics like the Great Pacific Garbage Patch and the Great Green Wall of Africa illustrate geography in action, and 10 brief spotlights from around the world draw the reader in with relevant facts.

Internationale Tagung MBA 2007 Matthias Kühle-Weidemeier, 2007-05-18 300 Teilnehmer aus 37 Staaten trafen sich vom 22. 24. Mai 2007 in Hannover zur 2. internationalen Tagung MBA und automatische Abfallsortierung. Die von Wasteconsult international veranstaltete Tagung hat sich damit als international meistbeachtete Tagung zur mechanisch biologischen Abfallbehandlung MBA etabliert. Nicht nur in Europa sondern auch in Entwicklungs- und Schwellenländern besteht ein wachsendes Interesse an der MBA wie Tagungsbeiträge aus Indien, Thailand und dem Iran zeigten. Neben der Abtrennung von stofflich und energetisch verwertbaren Materialien ist dort meist auch die Gewinnung von Kompost aus gemischten Siedlungsabfällen ein Behandlungsziel. Das Gros der Referenten und Tagungsteilnehmer kam jedoch aus Westeuropa und Australien. In diesen Staaten ist in den kommenden Jahren mit einem erheblichen Ausbau der MBA Kapazitäten zu rechnen. Aufgrund teilweise geringerer Anforderungen z. B. keine 30 BImSchV und anderer Ausrichtung der Anlagen kann eine MBA dort deutlich kostengünstiger sein als in Deutschland. Die Tagung begnügt sich jedoch nicht mit dem gegenwärtigen Stand der Anlagen sondern setzte auch einen Schwerpunkt auf die vermehrte Gewinnung und Qualitätsverbesserung von verwertbaren Stoffströmen durch sensorgestützte Sortierverfahren und verbesserte Aufbereitungstechniken. Kurzfristig besteht hier insbesondere bei den heizwertreichen Fraktionen Verbesserungsbedarf damit marktgerechte Produkte entstehen. Die Hauptkapitel des Tagungsbandes sind: I Allgemeine und internationale Aspekte der MBA II Kurzpräsentationen einzelner Verfahrenstechniken III Betriebserfahrungen und Optimierung von MBA IV Mechanische Behandlung und automatische Sortierung V Verwertung und Vermarktung von Stoffströmen aus der MBA VI Biologische Behandlung VII Analyse von Abfalleigenschaften VIII Emissionen und Emissionsbehandlung IX Poster.

proportion of waste is re used recycled composted or used to produce energy Nearly half of all waste is still sent to landfill sites where it contributes to climate change producing 3 per cent of the country s greenhouse gases and 40 per cent of its methane emissions The Committee notes the so called Primark effect which has led to large increases in the amount of clothing sent to landfill sites Food waste is another significant component of waste sent to landfill sites and householders food producers and retailers need to do more to reduce the amount of food discarded unnecessarily Waste should only be used for energy recovery if it is not possible to re use recycle or compost it **Human Activity and the Environment**
