motivating both educators and students to become actively engaged in the pursuit of ecological preservation It is here that this book comes into play Faced with the polluting of the earth the devastating effect of climate change and the inequalities of North South resources to counter the throes of environmental degradation our responsibility as educators and in particular as eco pedagogues is to engage in theoretical discourses on the subject matter but also to begin to provide practitioners in all fields with essential tools to shape an ecological sense of consciousness among future leaders of the earth our students
