

# 5 WAYS TO GO ZERO WASTE

Every day, the average American creates about **4.4 pounds of waste** – adding up to **258 million tons** in American landfills yearly.

Kathryn Kellogg, founder of [GoingZeroWaste.com](http://GoingZeroWaste.com), can fit all the trash she's thrown away in the past two years in one mason jar. Here's what she recommends for reducing personal waste:

## 1. Buy less.

By simply consuming less, we can greatly reduce the amount we throw away.

## 2. Don't throw your food scraps in the landfill.

Start a compost pile, look for a city collection or plug into a community garden.

## 3. Stop paying for trash.

Disposable items are expensive in the long run. Switching from paper towels to cloth rags can save the average family \$300 a year.

## 4. Keep it real.

Use real plates, real flatware and cloth napkins.

## 5. Get your green clean on.

An all-purpose cleaner of one part vinegar and one part water can be used on everything except marble and granite!
