Research Handbook on the Law of Artificial Intelligence Woodrow Barfield, Ugo Pagallo, 2018-12-28 The field of artificial intelligence AI has made tremendous advances in the last two decades but as smart as AI is now it is getting smarter and becoming more autonomous This raises a host of challenges to current legal doctrine including whether AI algorithms should count as speech whether AI should be regulated under antitrust and criminal law statutes and whether AI should be considered as an agent under agency law or be held responsible for injuries under tort law This book contains chapters from US and international law scholars on the role of law in an age of increasingly smart AI addressing these and other issues that are critical to the evolution of the field

The Business Model: How to Develop New Products, Create Market Value and Make the Competition Irrelevant Alexander Chernev, 2017-03-19 New product success is often attributed to intuition Yet while some products born from intuition do make it big many others crash and burn The reason is that intuition is only one aspect of new product development The other key ingredient of success is having a business model that outlines the ways in which new products will create market value This book offers a systematic approach to identifying market opportunities and developing breakthrough business models It outlines the key principles of business model generation presents a value based framework

for developing viable new offerings and provides a set of practical tools for creating a meaningful value proposition that drives market success The business model framework outlined in this book applies to a wide range of companies startups and established enterprises consumer packaged goods companies and business to business enterprises high tech and low tech ventures online and brick and mortar entities product manufacturers and value added service providers nonprofit organizations and profit driven companies Practical actionable and succinct The Business Model is the essential reference and how to guide for everyone seeking to achieve market success from entrepreneurs to experienced managers from senior executives to product designers from those creating new market offerings to those improving on existing ones This book is for those passionate about building great products that create market value and disrupt industries *Smart Sensors at the IoT Frontier* Hiroto Yasuura, Chong-Min Kyung, Yongpan Liu, Youn-Long Lin, 2017-05-29 This book describes technology used for effective sensing of our physical world and intelligent processing techniques for sensed information which are essential to the success of Internet of Things IoT The authors provide a multidisciplinary view of sensor technology from materials process circuits to big data domains and they showcase smart sensor systems in real applications including smart home transportation medical environmental agricultural etc Unlike earlier books on sensors this book provides a global view on smart sensors covering abstraction levels from device circuit systems and algorithms *A New Companion to Digital Humanities* Susan Schreibman, Ray Siemens, John Unsworth, 2016-01-26 This highly anticipated volume has been extensively revised to reflect changes in technology digital humanities methods and practices and institutional culture surrounding the valuation and publication of digital scholarship A fully revised edition of a celebrated reference work offering the most comprehensive and up to date collection of research currently available in this rapidly evolving discipline Includes new articles addressing topical and provocative issues and ideas such as retro computing desktop fabrication gender dynamics and globalization Brings together a global team of authors who are pioneers of innovative research in the digital humanities Accessibly structured into five sections exploring infrastructures creation analysis dissemination and the future of digital humanities Surveys the past present and future of the field offering essential research for anyone interested in better understanding the theory methods and application of the digital humanities *Humans 3.0: The Upgrading of the Species* Peter Nowak, 2015-01-19 Welcome to Human 3 0 *Cut Your Utility Bills in Half* James T. Dulley, 1993 **Left to Their Own Devices** Julie M. Albright, 2019-04-16 A sociologist explores the many ways that digital natives interaction with technology has changed their relationship with people places jobs and other stabilizing structures and created a new way of life that is at odds with the American Dream of past generations Digital natives are hacking the American Dream Young people brought up with the Internet smartphones and social media are quickly rendering old habits values behaviors and norms a distant memory creating the greatest generation gap in history In this eye opening book digital sociologist Julie M Albright looks at the many ways in which younger people facilitated by technology are coming untethered from traditional

aspirations and ideals and asks What are the effects of being disconnected from traditional stabilizing social structures like churches marriage political parties and long term employment What does it mean to be human when one s ties to people places jobs and societal institutions are weakened or broken displaced by digital hyper connectivity Albright sees both positives and negatives On the one hand mobile connectivity has given digital nomads the unprecedented opportunity to work or live anywhere But new threats to well being are emerging including increased isolation anxiety and loneliness decreased physical exercise ephemeral relationships fragmented attention spans and detachment from the calm of nature In this time of rapid global technologically driven change this book offers fresh insights into the unintended societal and psychological implications of lives exclusively lived in a digital world

Leveraging Embedded Factors of Business Ecosystems. A Potential Driver for Business Model Innovations ,2021-05-20 Master s Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 00 Catholic University Eichst tt Ingolstadt language English abstract This thesis aims to identify business ecosystem s embedded factors as potential drivers for business model innovations and thus to contribute to an expansion of innovation opportunities In the context of the consideration of different ecosystem concepts first their characteristics and roles are presented to make a precise distinction related and traditional structures e g value network supply chain Innovation ecosystems business ecosystems and platform ecosystems are considered in this study and empirically examined employing a multiple case study To ensure the value of the study only companies that have implemented a business model innovation within one of the defined ecosystems were included Innovations within the value chain of a single company can no longer fully satisfy new and dynamic customer needs It is therefore appropriate to intensify the network of relationships outside the company This is remedied by the value contribution resulting from the companies ecosystems which is higher than that of individual companies However in the ecosystem s environment the success of a company is strongly dependent on the success of its diverse and changing collaborations with other companies of different sizes and types Due to the embedding in different ecosystems the understanding of a company as an independent strategic actor is no longer appropriate in every case The Bottom Line Book of Everyday Solutions ,2002
