Clarke,Jennifer L. Clarke,2018-04-12 All scientific disciplines prize predictive success Conventional statistical analyses however treat prediction as secondary instead focusing on modeling and hence estimation testing and detailed physical interpretation tackling these tasks before the predictive adequacy of a model is established This book outlines a fully predictive approach to statistical problems based on studying predictors the approach does not require predictors correspond to a model although this important special case is

included in the general approach Throughout the point is to examine predictive performance before considering conventional inference These ideas are traced through five traditional subfields of statistics helping readers to refocus and adopt a directly predictive outlook The book also considers prediction via contemporary black box techniques and emerging data types and methodologies where conventional modeling is so difficult that good prediction is the main criterion available for evaluating the performance of a statistical method Well documented open source R code in a Github repository allows readers to replicate examples and apply techniques to other investigations

Sources of News and Current Affairs Australian Broadcasting Authority, 2001 A study to enable the ABA to gain a better understanding of the notion of influence in light of Parliament's intent that different levels of regulatory control be applied across the range of broadcasting services according to the degree of influence that different types of broadcasting services are able to exert in shaping community views To do this it was necessary to survey both those who produce the news and current affairs broadly defined and those who consume them the public
