Richard Meier Recent Works:

Richard Meier Silvio Cassarà, 2004 Beginning with his ascent in the late 1960s the work of Richard Meier has been identified with a careful but decisive reflection on modernity its origins and its potential as a continuing source of innovation Collected here for the first time in paperback are the large scale projects Meier developed during the last decade mature works that coincide with his celebration as one of the world s foremost architects His reflections on being heir to an abstract modernist ethic meld together with his concepts of the city and the contemporary landscape Meier s architecture privileges large public works above others using their monumentality to imagine the possibilities of contemporary civic spaces The recent Church for the Jubilee in Rome demonstrates the conjunction of modernity with simplicity and emotion of form light and material But Meier also uses smaller scale private commissions such as the celebrated 173 176 Perry Street residential towers in New York as an opportunity to explore the limits of his unique and immediately recognizable brand of modernism

reconstruction of a Japanese house and garden Drexler's boundary pushing shows promoted new ideas about architecture and design as modern arts in contemporary society The department's public and educational programs projected a culture of popular accessibility offsetting MoMA's reputation as an elitist institution Drawing on rigorous archival research as well as author Thomas S Hines's firsthand experience working with Drexler Architecture and Design at the Museum of Modern Art analyzes how MoMA became a touchstone for the practice and study of midcentury architecture Contemporary Designers Sara Pendergast,1997 This volume offers an insight into the lives and works of the most influential designers of this era in one complete guide Some of the designers included are Kenji Ejuan frogdesign Sori Yanagi and Herman Zapf

Contemporary Architects Ann Lee Morgan,Colin Naylor,1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor's note **The Critical Edge** Tod A. Marder,1985 The Critical Edge identifies and presents case histories of the 12 most talked about buildings of our times No other buildings of this era have so aroused the public so divided the profession and so stimulated the press as those that are discussed here The authors have canvassed the widest possible range of literature and commentary on each building from airline magazines to professional journals to plot the vicissitudes of their subjects critical fortunes and popular reputations All of the important architectural concerns of the 1970s and 1980s are expressed in this book Discussions of issues range from the initial conception of a building to advanced phases of its use and include questions about planning theory financing and construction use misuse and disuse wherever these have been raised Introductory essays are by Tod A Marder Chairman of the Department of Art History at Rutgers University Robert Bruegmann Professor at the University of Illinois Chicago and Martin Filler architectural critic and editor of House and Garden Marder discusses the relationship between architectural criticism and public opinion Bruegmann analyzes the nature of the controversies surrounding these buildings in light of controversies about earlier buildings and Filler takes up architectural criticism in the context of the publishing industry by considering the relationships of writer editors publishers advertisers and readers to their various constituencies The Critical Edge is copublished with The Jane Voorhees Zimmerli Art Museum of Rutgers University Richard Meier, Architect Richard Meier,1991 The third volume in Rizzoli's bestselling Richard Meier monograph series presents 24 of the Pritzker Prize winning architect's post 1985 works including those currently in design furniture and decorative objects Spectacular new photography showcases the Getty Center and other recently completed projects 250 color and 200 b w illustrations

Blaser presents the most important buildings and projects that Richard Meier has produced and designed in recent years. All the buildings and projects are presented from the same aspects: situation, program, circulation, structure, texture, layers. This permits an effective comparison of the various buildings and brings out their aesthetic individuality and the guiding principles behind their construction. By highlighting key details, the monograph demonstrates the allegiance of Meier's latest works to the ideal of classical art, combining the simple with the noble into a contemporary harmonious whole.
