Bank,2019 A substantial portion of the world s rice is produced and consumed in the Asia and Pacific region As much of the
region s population depends on rice farming for consumption and livelihood the demand for good quality statistics remains
essential for effective policy formulation Recent advances in remote sensing serve as a viable alternative to traditional
methods of compiling agricultural statistics by responding to the emerging data requirements and overall needs of modern
agriculture especially for staple commodities such as rice This publication outlines the procedures methods and tools
developed for generating statistics on paddy rice area and production using remote sensing and GIS techniques It is intended
to encourage and assist national statistical systems in piloting and adopting satellite based techniques as an alternative to
existing data collection methods while enabling other interested readers to comprehend whether the adoption of these
methodologies can improve the quality and timeliness of agricultural statistics The handbook also serves as a complement to
