Science Experiments Samsung Galaxy Review:

Mobile Research Axel Theobald, 2017-08-22 Dieses Buch bietet einen aktuellen Überblick zur mobilen Online Forschung. Ziel ist es sowohl die Grundlagen des neuen Forschungszweigs zu skizzieren als auch aktuelle Anwendungsfälle und Praxisbeispiele zu beschreiben, um dem Leser die Möglichkeiten von Mobile Research zu veranschaulichen. Darüber hinaus werden auch Forschungsansätze präsentiert, die derzeit noch im experimentellen Stadium sind, aber ein hohes Entwicklungspotenzial aufweisen. Die Online Forschung ist die wichtigste Befragungsmethode für Markt und Sozialforscher weltweit. Wie andere Bereiche auch, unterliegt die Branche gerade einem merklichen Wandel durch das mobile Internet sowie die rasende Verbreitung entsprechender Kommunikationsmittel wie Smartphones und Tablets. Dieser Trend wird sich ohne Zweifel fortsetzen und in der Marktforschungs Praxis Spuren hinterlassen. Der Inhalt: Mobile Marktforschung weltweit, Gestalterische Umsetzung mobil optimierter Befragungen, Auswirkungen auf die Datenqualität, Aufbau und Betrieb mobilbasierter Access Panels, Neue Fragetypen für die mobile Marktforschung, Einflüsse von Mobile Research auf die qualitative Forschung, Mobile Ethnographie, Marktforschung und das Internet of Things.

Ethics and Experiments Scott Desposato, 2015-12-22 For most of political science's history, discussions about professional ethics had nothing to do with human subjects. Professional ethics involved integrity in the classroom, fair tenure and promotion rules, and the careful avoidance of plagiarism. As most research was observational, there was little need for attention to how scholarly activities might directly affect the subjects of our work. Times have changed. The dramatic growth in the use of experiments in social science, especially overseas, is generating unexpected ethical controversies. The purpose of this volume is to identify, debate, and propose practical solutions to the most critical of these new ethical issues. A leading team of internationally distinguished political science scholars presents the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies. Part 1 examines contextual challenges provided by experiments conducted overseas: questions of culture, religion, security, and poverty. Part 2 examines questions of legal constraints on research, focusing on questions of foreign review of international experiments. Part 3 tackles the critical issues in field experiments, including deception and consent, impact on elections and careers, the boundaries of the public officials exemption, and the use of partner organizations to avoid Institutional Review Board (IRB) review. Part 4 considers strategies for the future, including training and education, IRB reform, institutional changes, and norm development.
