Algorithms for the People Josh Simons, 2025-07-08 How to put democracy at the heart of AI governance Artificial intelligence and machine learning are reshaping our world Police forces use them to decide where to send police officers judges to decide whom to release on bail welfare agencies to decide which children are at risk of abuse and Facebook and Google to rank content and distribute ads In these spheres and many others powerful prediction tools are changing how decisions are made narrowing opportunities for the exercise of judgment empathy and creativity In *Algorithms for the People* Josh Simons flips the narrative about how we govern these technologies Instead of examining the impact of technology on democracy he explores how to put democracy at the heart of AI governance Drawing on his experience as a research fellow at Harvard University a visiting research scientist on Facebook's Responsible AI team and a policy advisor to the UK's Labour Party Simons gets under the hood of predictive technologies offering an accessible account of how they work why they matter and how to regulate the institutions that build and use them He argues that prediction is political human choices about how to design and use predictive tools shape their effects Approaching predictive technologies through the lens of political theory casts new light on how democracies should govern political choices made outside the sphere of representative politics Showing the connection between technology regulation and democratic reform Simons argues that we must go beyond conventional theorizing of AI ethics to wrestle with fundamental moral and political questions about how the governance of technology can support the flourishing of democracy

Digital Competition Law in Europe Marc Wiggers, Robin Struijlaart, Joost Dibbets, 2023-07-14 Digital competition a term and concept that has risen to the forefront of competition law may be viewed as both promising and cautionary on the one hand it brings the promises of increased speed efficiency and objectivity and on the other it entails potential pitfalls such as hard to identify pathways to unfair pricing dominant positions and their potential abuse restriction of choice and abuse of personal data Accordingly jurisdictions around the world are taking measures to deal with the phenomenon In this concise but thoroughly researched book both informative and practical lawyers from two prominent firms with specialised digital competition teams take stock and examine the state of digital competition in the enforcement practices of six competition authorities in Europe most of these forerunners in the field of digital competition policy and enforcement The competition authorities surveyed are those of the European Union the United Kingdom France Germany the Netherlands and Belgium For each an overview spanning the period from 2012 to mid 2022 but including as many landmark cases as possible up to and including December 2022 includes not only landmark cases in which digital technologies have had a significant impact on the competition law outcome but also guidance documents such as speeches policy statements industry surveys and research reports Activities and enforcement practices of the various authorities include the following and more degree of activity focus of the activity enforcement styles enforcement instruments visible effectiveness of enforcement and important insights and outlooks Each overview contains

separate chapters on cartel prohibition the prohibition of abuse of a dominant position and merger control Additional chapters partially written by guest authors who are all without a doubt true thought leaders Tristan Byrne Giuseppe Colangelo Ai Deng Teodora Groza Daniel M ndrescu Wolf Sauter Thibault Schr pel and Gareth Shier evaluate the similarities and differences in the enforcement practices and the positive and negative effects of digital competition in the jurisdictions investigated the economic context the most important game changers and a concluding chapter offers recommendations An indispensable guide to quickly and accessibly acquiring in depth knowledge of competition law in the digital sector this matchless volume is a must read for any practitioner or academic who encounters competition law related to digital markets The dilemmas and challenges of the new competition law reality which is here already like it or not are clearly explained here for the benefit of regulators academics policymakers judges in house counsel and lawyers specialising in competition law and intellectual property law *Competition Law for the Digital Economy* Björn Lundqvist, Michal S. Gal, 2019-12-27 The digital economy is gradually gaining traction through a variety of recent technological developments including the introduction of the Internet of things artificial intelligence and markets for data This innovative book contains contributions from leading competition law scholars who map out and investigate the anti competitive effects that are developing in the digital economy

Corporate Acquisitions And Mergers in the European Union Riccardo Celli, Philippe Noguès, Christian Peeters, Rebecca Evans, 2024-04-17 Derived from Kluwer s multi volume Corporate Acquisitions and Mergers the largest and most detailed database of M due diligence contractual protection consideration and the impact of applicable company competition tax intellectual property environmental and data protection law on the acquisition process Corporate Acquisitions and Mergers is an invaluable guide for both legal practitioners and business executives seeking a comprehensive yet practical analysis of mergers and acquisitions in the European Union Equivalent analyses of M A law and practice in some 50 other jurisdictions all contributed by leading law firms are accessible on line at www.kluwerlawonline.com under Corporate Acquisitions and Mergers Big Tech Acquisitions and Merger Control Nils Stock, 2025-09-30 Big Tech Acquisitions and Merger Control Challenges Posed by Digital Platforms and Ecosystems Nils Stock Although legal analysis of merger related firm dominance in Big Tech has emphasised the so called GAFAM Google Amazon Facebook Apple and Microsoft this important book stresses the necessity for a much broader view Numerous large tech platforms continue to seek dominance in and across various market segments by acquiring small start up companies with high competitive potential but yet little or no turnover thereby running the risk of escaping antitrust scrutiny This phenomenon is now often referred to as killer acquisitions and it raises problems with regard to both the jurisdictional and the substantive aspects of merger control which this book addresses comprehensively Focusing on legislative initiatives and enforcement practice especially in the European Union and the United Kingdom and through an in depth analysis of the most prominent decisions concerning Big Tech acquisitions the author spells out the nature of such relevant legal issues and strategies as the following

the economic principles of platform competition and the particularities of digital ecosystems including their implications for merger control an extensive comparison of different jurisdictional rules and notification requirements beyond standard turnover thresholds how Big Tech acquisitions can be subjected to scrutiny in the European Union via referrals under Article 22 of the European Union Merger Regulation EUMR potentially in combination with national call in tools and or Article 14 of the Digital Markets Act DMA and how the latter compares to the reporting requirement under the Digital Markets Competition and Consumers DMCC Act in the United Kingdom market definition and market power assessments including but not limited to social media and advertising markets how both traditional and novel theories of harm can be applied in the context of digital platforms and ecosystems application of theories of harm relating to killer acquisitions and reverse killer acquisitions the development of an ecosystem theory of harm and artificial intelligence as the new frontier Policy proposals and the academic legal literature are taken into account with due regard to economic considerations as well With competition authorities and legislators worldwide grappling to find an appropriate response to the expansion and consolidation of dominance in various digital markets it appears necessary to contemplate alternatives to the current turnover based notification thresholds and to rethink the substantive assessment of Big Tech acquisitions This book with its thorough guidance on the characteristics challenges and treatment of digital platforms and ecosystems in the context of merger control and its clear exposition of applicable theories of harm will greatly assist practitioners competition authorities and policymakers to successfully navigate through the challenging tasks of establishing jurisdiction defining relevant markets and assessing market power and competitive harm

Translation as a Social Activity Minako O'Hagan, 2011 The new communications infrastructure based on Web 2.0 suggests a formidable impact on translation The prevailing technological trends for openness sharing and collaboration are prompting participation by the Internet crowd in well established professional areas of work leading to the emergence of community translation or so called translation crowdsourcing Under the theme of community translation as a social activity and its possible consequences contributors in this volume consolidate the developments to date and cover the latest initiatives while addressing pertinent issues arising from the blurred boundary between professionals and non professionals Page 4 of cover
