## **Plastic Optical Fibers Principles Components Installation:**

**Plastic Optical Fibers** Andreas Weinert,1999 In recent years there has been a meteoric rise in the use of plastic fiber optic cables e g for data transmission on short to medium length transmission paths The reason for this is that plastic fiber optic cables can be connected to the relevant transmission components at low cost and using simple tools This book offers an introduction to the physical principles of the new technology and describes the materials and manufacturing process of plastic fibers as well as the construction of plastic fiber optic cables It describes various types of cable as well as transmitting and receiving components in the transmission path and provides useful tips on the processing and installation of plastic fiber optic cable Reference is also made to important national and international standards This book is intended for anyone involved in the development planning or installation of plastic fiber optic cable systems The fundamental structure of the book also makes it suitable for university lecturers and students Optical Fiber Fusion Splicing Andrew D.

Yablon,2005-12-17 This book is an up to date treatment of optical fiber fusion splicing incorporating all the recent innovations in the field It provides a toolbox of general strategies and specific techniques that the reader can apply when optimizing fusion splices between novel fibers It specifically addresses considerations important for fusion splicing of contemporary specialty fibers including dispersion compensating fiber erbium doped gain fiber polarization maintaining fiber and microstructured fiber Finally it discusses the future of optical fiber fusion splicing including silica and non silica based optical fibers as well as the trend toward increasing automation Whilst serving as a self contained reference work abundant citations from the technical literature will enable readers to readily locate primary sources **POF Cables , Polymers and Electromagnetic Radiation** Wolfram Schnabel,2014-01-10 This first book to cover the interaction of polymers with radiation from the entire electromagnetic spectrum adopts a multidisciplinary approach to bridge polymer chemistry and physics photochemistry photophysics and materials science The text is equally unique in its scope devoting equal amounts of attention to the three aspects of synthesis characterization and applications The first part deals with the interaction of polymers with non ionizing radiation in the frequency range from sub terahertz via infrared radiation to visible and ultraviolet light while the second covers interaction with ionizing radiation from the extreme ultraviolet to ray photons The result is a systematic overview of how both types of radiation can be used for different polymerization approaches spectroscopy methods and lithography techniques Authored by a world renowned researcher and teacher with over 40 years of experience in the field this is a highly practical and authoritative guide **POF Graded Index Lenses , Pof & 1394 ,**
