Right To Learn Alternatives For A Learning Society:

The Right to Learn Ken Brown, 2002 The Right to Learn raises questions about the future of the learning society It suggests that the rights of children and parents are not being addressed by the UK Government's concentration on a highly centralized education system The Right to Learn Ken Brown, 2002 The Right to Learn raises questions about the future of the learning society It suggests that the rights of children and parents are not being addressed by the UK Government's concentration on a highly centralized education system **The Human Rights-Based Approach to Higher Education**

Jane Kotzmann, 2018-04-05 A human right to higher education was included in the International Covenant on Economic Social and Cultural Rights ICESCR which came into force in 1976 Yet the world has changed significantly since the ICESCR was drafted State legislation and policies have generally followed a neoliberal trajectory shifting the perception of higher education from being a public good to being a commodity able to be bought and sold This model has been criticized particularly because it generally reinforces social inequality At the same time attaining higher education has become more important than ever before Higher education is a prerequisite for many jobs and those who have attained higher education enjoy improved life circumstances This book seeks to determine Is there still a place for the human right to higher education in the current international context In seeking to answer this question this book compares and contrasts two general theoretical models that are used to frame higher education policy the market based approach and the human rights based approach In the process it contributes to an understanding of the likely effectiveness of market based versus human rights based approaches to higher education provision in terms of teaching and learning This understanding should enable the development of more improved sophisticated and ultimately successful higher education policies This book contends that a human rights based approach to higher education policy is more likely to enable the achievement of higher education purposes than a market based approach In reaching this conclusion the book identifies and addresses some strategic considerations of relevance for advocates of a human rights based approach in this context *Philosophy of Education:*

Society and education Hirst, Paul Heywood Hirst, Patricia White, 1998 *Education, Society, and Development* Jandhyala B. G. Tilak, 2003 Contributed articles Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael Timpane, Roger W. Benjamin, 2000 Why do America's public schools seem unable to meet today's social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today's education system seems more concerned with producing good employees than good citizens Meanwhile our country's diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today's leading

education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived. It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic. The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship. An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey. A second group identifies flaws in how schools are currently governed and offers models for change. A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy. Spanning philosophy, history, sociology, and political science, this book brings together the best current thinking about the specifics of education policy: vouchers, charter schools, national testing, and about the role of deliberation in a democracy. It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future.

Basic Education Gerald Lee Gutek, 1981. This publication clarifies the basic education movement by placing it in a historical and philosophical context. In many ways, the basic education movement of the 1970s is part of a continuum of similar movements in American education that have occurred with almost clocklike regularity, appearing in rather regular cycles since the 1930s. First, the current basic education movement that originated in the 1970s is reviewed. Criticisms made by proponents of basic education and some remedies proposed that may cure the problems believed to exist today in public schooling are presented. The Essentialist movement of the 1930s is then examined. The Essentialists were a group of professional educators who challenged the then progressive trends in American education. Like today's advocates of basic education, the Essentialists charged that public education, despite its vast extent and heavy cost to society, was appalling, weak, and ineffective. They believed it was crucial that the curriculum be organized systematically and sequentially and that instruction stress logical, chronological, and causal relationships. They argued that the teacher should be restored to a position of central authority in the classroom. Lastly, the publication discusses arguments of the educational critics of the 1950s. A new educational movement called Life Adjustment Education, brought about by World War II, became the target for a group of educational critics. The proponents of Life Adjustment Education maintained that the purpose of the schools should be broader in scope than strictly academic programs. The critics perceived of the function of the school in academic terms.
