The Routledge Handbook of Islamic Economics and Finance Hussain Mohi-ud-Din Qadri, M. Ishaq Bhatti, Mohd Azmi Omar, 2025-08-06 Islamic finance is one of the fastest growing sectors of the finance industry due to a number of factors including the technology boom fintech blockchain and higher oil and commodity prices but also in particular its demand by 1.5 billion Muslims around the globe. It enjoys sustainably higher positive returns compared to its conventional finance counterparts specifically during financial crises. Moreover, it plays a major role in implementing the UN's Sustainable Development Goals due to its non-traditional source of long-term fund financing that advances social, environmental, and economic goals. The Routledge Handbook of Islamic Economics and Finance offers a detailed introduction to the current scholarship in this ever-expanding and emerging field. The book is divided into three parts covering Islamic business, Islamic economics, and Islamic finance respectively. Each chapter provides a balanced overview of current knowledge, identifying issues and discussing the relevant debates. The book seeks to explore the current developments and trends in Islamic economics, Islamic banking, and Islamic capital markets. It also covers the areas of Islamic social finance, impact investment, and Islamic microfinance, SMEs, poverty alleviation, and financial inclusion. Additionally, it launches the debate on the emergence, progress, challenges, and future potential of Islamic fintech and the Islamic digital economy. Furthermore, it sheds light on subjects such as the marketing of Islamic financial services and products, the circular economy, and the blue economy from an Islamic financial perspective. As well as surveying the current state of the art, the authors also reflect on where the research agenda is likely to advance in the future, making this the definitive resource for scholars and researchers in this area.

Risk-Based Tax Audits Munawar Sultan Khwaja, Rajul Awasthi, Jan Loeprick, 2011-06-08 Revenue administration is a major interface between the state and its citizens. A good revenue administration is therefore an important attribute of good government. As a result, in recent years, policy makers have become increasingly aware of the importance of policies that will promote business development while ensuring voluntary tax compliance. In the modern context, it is neither desirable nor feasible to examine or inspect every single taxpayer. The revenue administration therefore has to rely on effective management of compliance. Promoting voluntary compliance achieved through a self-assessment system in which taxpayers comply with their tax obligations without intervention from tax officials requires developing modern approaches to audits based on risk management. The impact of audits critically depends on a properly designed audit selection strategy focused on high-risk taxpayers to provide the most cost-effective outcome. This, in itself, contributes to promoting voluntary compliance. Risk-based country audits, approaches, and country experiences are an important study of this critical revenue function of compliance management. Publisher's website
