Managing Risk in Projects David Hillson, 2017-05-15 Projects are risky undertakings and modern approaches to managing projects recognise the central need to manage the risk as an integral part of the project management discipline Managing Risk in Projects places risk management in its proper context in the world of project management and beyond and emphasises the central concepts that are essential in order to understand why and how risk management should be implemented on all projects of all types and sizes in all industries and in all countries The generic approach detailed by David Hillson is consistent with current international best practice and guidelines including A Guide to the Project Management Body of Knowledge PMBoK and the Project Risk Management Practice Standard from PMI the APM Body of Knowledge and Project Risk Analysis Management PRAM Guide from APM Management of Risk Guidance for Practitioners from OGC and the forthcoming risk standard from ISO but David also introduces key developments in the risk management field ensuring readers are aware of recent thinking focusing on their relevance to practical application Throughout the goal is to offer a concise description of current best practice in project risk management whilst introducing the latest relevant developments to enable project managers project sponsors and others responsible for managing risk in projects to do just that effectively

An Analysis of Regulatory Frameworks for Wireless Communications, Societal Concerns and Risk Haim Mazar, 2009 This thesis analyses how and why culture and geography influence the allocation and licensing of the radio frequency RF spectrum in different nations Based on a broad comparative study of 235 countries an inter disciplinary approach is used to explore regulatory frameworks and attitudes toward risk In addition detailed case studies of the UK France the US and Ecuador provide deeper insights into the main contrasting regulatory styles Three alternative sociological theories are used to analyse and explain the results for both the in depth and broad brush studies The Cultural Theory of Mary Douglas and co workers is first used to categorise countries in terms of perceptual filters The empirical findings indicate some countries to be apparently exceptional in their behaviour The theory of Bounded Rationality is used to investigate and explain these apparent irrationalities Finally Rational Field Theory shows how beliefs and values guide administrations in their RF regulation A number of key factors are found to dominate and patterns emerge The European RF harmonisation is unique Following European unification wireless regulation is divided into two major camps the EU and the US which differ in their risk concerns approach to top down mandated standards allocation of RF spectrum to licence exempt bands and type approval process The adoption of 3G cellular UMTS versus CDMA2000 and digital TV standards DVB T ATSC ISDB T around the world reflects geopolitical and colonial influence The language of a country is a significant indicator of its analogue TV standard SECAM PAL NTSC Interestingly the longitude of a country to a fair extent defines RF allocation Africa and West Asia follow Europe whereas the Americas approximate the US RF regulation and risk tolerability differ between tropical and non tropical climates The collectivised centralised versus the individualised market based rationalities result in different

regulatory frameworks and contrasting societal and risk concerns The success of the top down European GSM and the bottom up Wi Fi standards reveal how the central planning and market based approaches have thrived Attitudes to RF human hazards and spurious emissions levels reveal that the US Canada and Japan are more tolerant of these radiation risks than Europe Australia Canada New Zealand UK and USA encourage technological innovation A practical benefit of this study is that it will give regulators more freedom to choose a rational RF licensing protocol by better understanding the possibly self imposed boundaries of cultural and geographical factors which are currently shaping allocation Academically there is utility in undertaking a cultural and geographic analysis of a topic that is mostly the domain of engineering economic and legal analysts

Public Support for Species Conservation Policies Valentina Fomenko,2003 The arduous task of finding a solution to the enduring salmon crisis calls for a non trivial comprehensive approach Such a solution is likely to affect virtually everyone in the Pacific Northwest Ensuring public understanding of and support for species restoration policies is especially important because many of such policies involve making difficult trade offs This issue is especially relevant to the situation in Oregon where citizens are directly involved in environmental policy making thus public support for salmon restoration options is a vital component of the policy process This study was designed to identify the major factors influencing public support for salmon restoration policies including policy relevant knowledge risk perception ideological and attitudinal factors as well as a sense of political efficacy and social trust Key findings indicate that ideological and attitudinal factors are the most important predictors of public support for salmon restoration alternatives such as removal of hydroelectric dams limiting certain agricultural and forestry practices elimination of hatcheries and urban stream protection measures Ideological and attitudinal variables have both direct and indirect impacts on policy support In addition higher levels of social trust and a sense of political efficacy also led to stronger support for salmon restoration policies The results presented in this study suggest the need for a more holistic approach to understanding the sources and assessing the limits of public support for salmon restoration options In general both outreach and research activities should concentrate on overcoming the negative impacts of ideological and attitudinal cleavages and reconciling seemingly insurmountable differences in opinions on salmon policy Providing additional knowledge should be tailored to the needs of the various constituencies and should be sensitive to a wide range of ideological stances and attitudinal positions **Subject Guide to Books in Print** ,1991 *American Book Publishing Record* ,1996-05
