Smart Home Usa:

Der Einfluss des wahrgenommenen Alterns auf die Akzeptanz von Smart-Home-Technologien Eichner, Andreas, 2021-08-31 Die bis dato eher verhaltene Nachfrage nach Smart Home Systemen gibt Anlass zu der Frage nach den maßgeblichen Adoptionsbarrieren In Anbetracht des potentiellen Nutzens dieser Technologien für das Leben der Bewohner besonders auch im fortschreitenden Alter besteht darüber hinaus Forschungsbedarf ob und in welcher Art sich das Altern auf die Technologieakzeptanz auswirkt Insbesondere sind auf subjektiver Wahrnehmung basierende Alterskonstrukte bisher kaum im Zusammenhang mit der Technologieadoption untersucht worden Die Arbeit befasst sich mit den Determinanten der Akzeptanz von Smart Home Anwendungen seitens potentieller Benutzer anhand populärer Theorien und Modelle zum individuellen Adoptionsverhalten und mit Blick auf die Einflusswirkung des chronologischen Alters bzw des subjektiv empfundenen Alterns Das gewählte Untersuchungsmodell basiert auf dem in der wissenschaftlichen Forschung weit verbreiteten und empirisch bewährten Technology Acceptance Model Davis Bagozzi Warshaw 1989 Zusätzlich werden alternativ externe Variablen in Form des chronologischen Alters bzw der Future Time Perspective Carstensen Lang 1996 einbezogen um insbesondere die Wirkung auf den wahrgenommenen Nutzwert und die empfundene Einfachheit der Nutzung von Hausautomatisierung zu untersuchen Betrachtet werden zudem Mediator und Moderatoreffekte hinsichtlich der nachgelagerten Einstellungsbildung und Bernahmeintention Die Ergebnisse stützen die Hypothese dass die subjektive Future Time Perspective mit Blick auf die im Leben verbleibenden Möglichkeiten einen größeren Erklärungsbeitrag zur individuellen Adoption von Smart Home Systemen leisten kann als das chronologische Alter

Szenarien einer digitalen Welt - heute und morgen Thomas Klauß, Annika Mierke, 2017-05-08 Digitale Transformation Wo stehen wir Was verändert sich Wo geht die Reise hin Dieses Buch ist ein einzigartiger Überblick über das was die digitale Entwicklung in der Gesellschaft Wirtschaft und Politik global verändert und weiter verändern wird Mit konkreten Beispielen visualisierten Zukunfts Szenarien und visionären Ausblicken liefert das Buch eine fundierte Grundlage für individuelle und strategische Entscheidungen und Ideen wohin die Reise gehen soll Fundierte Analysen gepaart mit positiven und kritischen Positionen Neueste Entwicklungen Trendanalysen und Handlungsempfehlungen Vermittelt eine komplexe Materie und erst anschaulich und unterhaltsam Ausgewogene interdisziplinäre und multithematische Perspektive Digitales Begleitmaterial zu aktuellen Entwicklungen Mit einem Geleitwort von Dr Mark Mattingley Scott Was bedeutet Digitale Transformation wie und wo verändert sie sich Wie wirken sich bereits heute Hardware Software und digitale Services auf unser privates gesellschaftliches und gesellschaftliches kulturelles und politisches Umfeld aus Wie beeinflussen sie unsere sozialen Beziehungen unsere Arbeit Mobilität unser Zuhause Gesundheits Freizeit Medien Konsumverhalten und Engagement Was verändert sich was entsteht was verschwindet und worauf können oder müssen wir uns einstellen und was können und sollten wir tun Diese Fragen stehen in diesem Buch im Mittelpunkt

Quantitative Logic and Soft Computing Bing-Yuan Cao, Shuili Chen, Guojun Wang, Sicong Guo, 2010-10-14 Admittedly the notion intelligence or intelligent computing has been around us for several decades implicitly indicating any non conventional methods of solving complex system problems such as expert systems and intelligent control techniques that mimic human skill and replace human operators for automation Various kinds of intelligent methods have been suggested phenomenological or ontological and we have been witnessing quite successful applications On the other hand Soft Computing Techniques is the concept coined by Lot Zadeh referring to a set of approaches of computing which parallels the remarkable ability of the human mind to reason and learn in an environment of uncertainty imprecision and partial truth Such a notion is well contrasted with the conventional binary logic based hard computing and has been effectively utilized with the guiding principle of exploiting the tolerance for uncertainty imprecision and partial truth to achieve tractability business and low solution cost The soft computing techniques are often employed as the technical entities in a tool box with tools being FL ANN Rough Set GA etc Based on one's intuition and experience an engineer can build and realize human like systems by smartly mixing proper technical tools effectively and efficiently in a wide range of fields For some time the soft computing techniques are also referred to as intelligent computing tools

Sensor Technology for Smart Homes Juan Ye, Michael O'Grady, Orestis Banos, 2021-04-21 This Special Issue presents the recent advances in sensor technologies for smart homes including fiber Bragg grating FBG sensors for detecting the presence and number of occupants the Internet of things for monitoring CO2 concentration and designing a novel eye tracking system for monitoring and controlling a smart home and infrared thermal sensors for fall detection Such new explorations are pushing the boundary of sensing technologies and thus will have more profound implications for the future smart home Advanced machine learning and data mining algorithms have been proposed to address sensor failure appliance identification and human activity recognition in a home environment These results will enable a promising sustainable deployment of sensing technologies A novel multi agent gamification system is proposed for managing tasks between household members and

between families which demonstrate another dimension of future smart home application This Special Issue concludes with a review on sensors for human activity recognition This work paves the roadmap for deploying smart home systems in different socioeconomic contexts The whole Special Issue has significantly helped to shape our understanding of the strength implications and barriers of deploying long term sustainable sensor technologies for smart homes Threshold Heather Suzanne Woods, 2024-05-15 Smart homes are domestic spaces outfitted with networked technology made by brands like Google Facebook Amazon and Apple However Silicon Valley purveyors are not the only important actors in smart home development Appliance makers logistics companies health and wellness conglomerates insurance companies and security franchises are all betting on the smart home in an economy that puts a premium on data Together major players in the smart home space have successfully attracted the attention and pocketbooks of millions of households by touting the virtues of ambient networked technologies as an upgrade to modern domestic life If industry predictions hold nearly half of American houses will be smart by 2024 Yet what it means to be smart is still unsettled Threshold asks and answers the question How do smart homes communicate cultural values about the role of technology in the 21st century Answering this question is time sensitive as the coming years will determine how smart homes are configured who has access to them and what they mean to their owners policy makers technology companies and others invested in these domestic digital platforms The consequences of these decisions are significant because they impact both smart home residents and society at large At present much of the research on smart homes caters either to industry experts or scientists and engineers This literature often describes or evaluates the technical capacities of the smart home or focuses on user interface and design Instead Heather Woods argues we need a sustained cultural analysis of smart homes that considers the socio technical variables gender class income disparity race criminal justice the housing market and the future of both labor and domesticity that give the smart home meaning Threshold takes up this challenge from a rhetorical perspective arguing that smart homes are lived material embodiments of the digital cultures in which they are imagined built and used Those considerations more often than not are relegated to secondary considerations when in truth they are the most pervasive and consequential factors affecting anyone participating in a smart home ecosystem Woods argues that smart homes are spatial manifestations of a phenomenon called living in digitality a cultural condition whereby users engage with technology at every moment of every day Using extensive fieldwork at smart homes throughout the USA Woods traces how smart homes urge ubiquitous computing as a normalized daily practice readying domestic spaces and their occupants for an increasingly transactional digital future that is largely controlled by corporate interests Threshold advances knowledge in three ways by 1 Offering definitional tools for identifying and evaluating immersive technologies including but not limited to the smart home 2 Identifying three distinct configurations of the smart home according to their domestic and technological functions 3 Demonstrating the productive capacity of smart homes and smart devices to influence social life The book highlights the rhetorical force of smart domesticity for rhetorical

scholars digital humanists political scientists critical theorists policy makers and residents or prospective residents of smart homes Ultimately Threshold serves as a toolkit for recognizing and responding to the persistent encroachment of digital technologies in all parts of our lives

Artificial Intelligence to Solve Pervasive Internet of Things Issues Gurjit Kaur, Pradeep Tomar, Marcus Tanque, 2020-11-18 Artificial Intelligence to Solve Pervasive Internet of Things Issues discusses standards and technologies and wide ranging technology areas and their applications and challenges including discussions on architectures frameworks applications best practices methods and techniques required for integrating AI to resolve IoT issues Chapters also provide step by step measures practices and solutions to tackle vital decision making and practical issues affecting IoT technology including autonomous devices and computerized systems Such issues range from adopting mitigating maintaining modernizing and protecting AI and IoT infrastructure components such as scalability sustainability latency system decentralization and maintainability The book enables readers to explore discover and implement new solutions for integrating AI to solve IoT issues Resolving these issues will help readers address many real world applications in areas such as scientific research healthcare defense aeronautics engineering social media and many others Discusses intelligent techniques for the implementation of Artificial Intelligence in Internet of Things Prepared for researchers and specialists who are interested in the use and integration of IoT and Artificial Intelligence technologies

Information Processing and Management of Uncertainty in Knowledge-Based Systems Marie-Jeanne Lesot, Susana Vieira, Marek Z. Reformat, João Paulo Carvalho, Anna Wilbik, Bernadette Bouchon-Meunier, Ronald R.
