## Physics For Nonscientists:

**Taking the Quantum Leap** Fred A. Wolf, 2010-10-19 World renowned physicist Fred Alan Wolf explains the scientific concepts of quantum mechanics in accessible language for nonscientists Winner of the National Book Award Taking the Quantum Leap entertainingly traces the history of physics from the observations of the early Greeks through the discoveries of Galileo and Newton to the dazzling theories of such scientists as Planck Einstein Bohr and Bohm This humanized view of science opens up the mind stretching visions of how quantum mechanics God human thought and will are related and provides profound implications for our understanding of the nature of reality and our relationship to the cosmos The prose indeed is exhilarating and exhibits a passion to explain humorously Wolf provides commendable explanations of visions and revisions of atomic models he is fin in particular on the Uncertainty Principle Enjoy the book for its bravura Kirkus Reviews

**Taking the Quantum Leap** Fred Alan Wolf, 1989 **The Boundaries of the New Frontier** Joanna S. Ploeger, 2009 This is a rhetorical case study in the evolving presentation of science to the public Joanna S Ploeger examines the communicative practices of the Fermi National Accelerator Laboratory in suburban Chicago to show how the rhetoric of science functions as an indicator of the intellectual and political interests of scientific institutions She delineates the rhetorical strategies by which Fermilab s founders especially Robert R Wilson sought the consent

cooperation and goodwill of its neighbors Wilson's rhetoric was an attempt to distinguish Fermilab from other laboratories in the national network by emphasizing that Fermilab was not a nuclear weapons laboratory and that its sole purpose was to advance theoretical physics for the sake of knowledge To dissociate itself from weapons research Fermilab incorporated the aesthetic of sublimity emblematic of the laboratory's focus on high energy physics into the design of its buildings grounds public art and outreach materials Ploeger tests the success of Wilson's rhetoric through extensive interviews with researchers administrators and visitors at Fermilab Wilson's visual rhetoric strategies were unable to counteract the persistent belief that Fermilab was involved in nuclear weapons research In later years the end of the cold war diminished the urgency of physics research This change in the national climate induced Fermilab's subsequent directors to stress the many potential uses of experimental physics thereby opening Fermilab to a variety of projects at the cost of the aesthetic Wilson had tried to project In tracking the evolution of the lab's representation of itself to its public Ploeger's work combines rhetorical criticism visual rhetorics and qualitative analysis of interview data in studying a salient example that comes into focus only when all three methods are deployed collectively
