Physics Of Nonideal Plasma:

The Physics Of Non-ideal Plasma Vladimr E Fortov,Igor T Iakubov,1999-11-22 This book is devoted to the physical properties of nonideal plasma which is compressed so strongly that the effects of interparticle interactions govern the plasma behavior The interest in this plasma was generated by the development of modern technologies and facilities whose operations were based on high densities of energy In this volume the methods of nonideal plasma generation and diagnostics are considered The experimental results are given and the main theoretical models of nonideal plasma state are discussed The problems of thermodynamics electro physics optics and dynamic stability are covered **Transport and Optical**

Properties of Nonideal Plasma I.T. Iakubov,G.A. Kobzev,M.M. Popovich,2013-06-29 The book is devoted to the physical properties of nonideal plasma in which the effects of interparticle interactions are substantial Such a plasma is usually compressed so strongly that it is called dense plasma Interest in plasma studies has increased over the last 10 or 15 years owing to the development of modern technology and sophisticated facilities whose operation is based on a high energy density As a result of a recent sharp increase in the number of experimental and theoretical investigations much interesting and reliable data on the properties of dense plasma have been obtained The data are distributed in a rapidly growing number of original publications and reviews This volume is a systematic treatment of the thermodynamics ionization equilibrium particle composition charge transport properties especially electric conductivity optical properties peculiarities of continuous and discrete spectra and collective modes features and manifestations of nonideal plasma Theoretical models are considered along with the experimental data The book is intended for the wide range of readers including specialists in plasma physics and various researchers who need knowledge in this field **Physics Of Nonideal Plasma** V. Quantum Statistics of Nonideal Plasmas Dietrich Kremp,Manfred Schlanges,Wolf-Dietrich Kraeft,T. Bornath,2005-02-11 This book deals with the statistical theory of strongly coupled Coulomb systems After an elementary introduction to the physics of nonideal plasmas a presentation of the method of nonequilibrium Green's functions is given On this basis the dielectric thermodynamic transport and relaxation properties are discussed systematically Especially the behavior of bound states in the surrounding plasma lowering of the ionization energy the ionization kinetics and the equation of state of dense partially ionized hydrogen are each carefully investigated Furthermore generalized kinetic equations are derived which are also valid for short time scales They are applied to ultra fast processes and to plasmas in laser fields

elementary processes of interest are those related to atomic transitions electronic conduction radiative transfer energy
