Physics of High Energy Particle Accelerators Melvin Month, Per F. Dahl, Margaret Dienes, 1985 *Physics of Particle Accelerators* Margaret Dienes, 1989 **An Introduction to the Physics of High Energy Accelerators** D. A. Edwards, M. J. Syphers, 2008-11-20 The first half deals with the motion of a single particle under the influence of electronic and magnetic fields The basic language of linear and circular accelerators is developed The principle of phase stability is introduced along with phase oscillations in linear accelerators and synchrotrons Presents a treatment of betatron oscillations followed by an excursion into nonlinear dynamics and its application to accelerators The second half discusses intensity dependent effects particularly space charge and coherent instabilities Includes tables of parameters for a selection of accelerators which are used in the numerous problems provided at the end of each chapter **High-Brightness Accelerators** Anthony D. Hyder, M. Franklin Rose, Arthur H. Guenter, 2012-12-06 A NATO Advanced Study Institute ASI on High Brightness Accelerators was held at the Atholl Palace Hotel Pitlochry Perthshire Scotland from July 13 through July 25 1986 This publication is the Proceedings of the Institute This ASI emphasized the basic physics and engineering of the relatively new and fast emerging field of high brightness particle accelerators These machines are high to very high current amperes to hundreds of kiloamperes modest voltage megavolt to tens of megavolts devices and as such are opposed to those historically used for high energy physics studies i e gigavolt and higher energies and rather low currents The primary focus of the Institute was on the physics of the accelerator and the beam including the dynamics equilibria and instabilities of high current beams near the space charge limit accelerator engineering techniques and the applications of high brightness beams in areas such as free electron lasers synchrotron radiation sources food processing and heavy and light ion fusion The Institute concentrated on bringing together several diverse but related communities which we hope benefited from this opportunity to interact the North American activity in machine technology engineering and diagnostics with the strong European theoretical community the basic beam physicists with the engineering technologists Free Electron Lasers - Proceedings Of The Beijing Fel Seminar Jiaer Chen, Jialin Xie, Kui Zhao, Xiangwan Du, 1989-03-01 At this International Seminar the six invited speakers presented several lectures each on current FEL research The volume contains papers on the theory and experimental research done on the oscillator including the Los Alamos Stanford TRW program and recent important achievements on Induction FEL at Lawrence Livermore **Superconductivity** A.
