Phytolith Systematics Emerging Issues:

Phytolith Systematics Susan C. Mulholland, George Rapp Jr., 1992-05-31 This volume is the first in the Advances in Archaeological and Museum Science series sponsored by the Society for Archaeological Sciences The purpose of this biennial series is to provide summaries of advances in closely defined topics in archaeometry archaeological science environmental archaeology preservation technology and museum conservation The Society for Archaeological Sciences SAS exists to encourage interdisciplinary collaboration between archaeologists and colleagues in the natural and physical sciences SAS members are drawn from many disciplinary fields However they all share a common belief that physical science techniques and methods constitute an essential component of archaeological field and laboratory studies The General Editors wish to express their appreciation to Renee S Kra and Frances D Moskovitz of Radiocarbon for their special expertise and assistance in the production of this volume We also appreciate the contribution of the two reviewers for their excellent comments and suggestions The General Editor responsible for undertaking the development of this volume was R E Taylor **Phytolith**

Systematics Susan C. Mulholland, George Rapp Jr, 2014-01-15 **Phytoliths - Applications in Earth Science and Human History** Jean Dominique Meunier, Fabrice Colin, 2001-01-01 This impeccably researched volume skillfully reports and discusses advances in phytolith research addressing in particular the use of phytoliths for deciphering fundamental issues in earth science and human history Comprising thirty reviews and original papers findings are presented in the following five sections phytoliths in palaeoclimatology and palaeoecology phytoliths diet and health archaeological structures ancient agricultures and palaeoethnobotany methodology taxonomy and taphonomy soil plant interaction **First**

European Meeting on Phytolith Research Ascensión Pinilla, 1997* Phytoliths Dolores R. Piperno, 2006-01-30 The study of phytoliths inorganic silica remnants plants leave behind when they die and decay has developed dramatically over the last twenty years New publications have documented a diverse array of phytoliths from many regions around the globe while new understandings have emerged as to how and why plants produce phytoliths Together these developments make phytoliths a powerful tool in reconstructing past environments and human uses of plants In Phytoliths Dolores Piperno makes sense of the discipline for both those working directly with phytoliths in the field or the lab as well as for those who rely on the results of phytolith studies for their own research Including over a hundred images Piperno's book will be of great benefit to archaeologists and paleobotanists in the classroom or the lab Phytolith Analysis Applied to Pleistocene-Holocene

Archaeological Sites in the Australian Arid Zone Doreen Bowdery, 1998 To explore the potential for phytolith analysis in Australian arid zone sediments silica phytoliths plant microfossils were isolated from archaeological sediments collected at three arid zone sites Line drawings of phytoliths extracted from archaeological deposits and contemporary plant material provided a reference point for purposes of classification analysis and quantification Various changes in these phytoliths were observed from the earliest occupation through to the Holocene which correlate with changes in lithic artefacts In particular

the appearance of grass seed grinders was recorded in the cultural assemblage after the introduction of new grass taxa. The timing of the change has some correlation with the final inundation of the land barrier to the north and sea level stabilisation. Other analyses suggest a continuous reduction in precipitation. These positive results indicate that phytolith analysis has great potential in arid areas providing a window into vegetation history and contributing data to an archaeological site history.

General Meeting, 2000 This volume of papers is the result of the Annual Meetings of the Archaeological Institute of America conference Washington 2003. The aim was to present the latest research in the field of palaeodietary studies in the Aegean. The theme of palaeodiet was chosen because it is arguably the most important field of study concerning the Aegean which complements archaeological fieldwork. Food and drink are just as essential for man's survival as shelter. What the ancient peoples in the Aegean ate is as important as the buildings they built or the artifacts they produced. The volume discusses how religion, social structure and ethnicity effects diet. The book also demonstrates skeletal evidence for nutrition in Mesolithic and Neolithic Greece looking at growth, oral health, bone composition and pathological changes in bone. The book challenges current methodology in recovering bio archaeological material whilst offering practical methods for gathering palaeodietary data. *Phytolith and Starch Research in the Australian-Pacific-Asian Regions* Diane M. Hart, 2003 This series reports the results of archaeological and related research within South East Asia but particularly in Australia, Papua New Guinea and island Melanesia. This issue brings together many of the papers and posters presented at a conference on phytolith and starch research in the region held at The Australian National University in Canberra in August 2001. The conference attracted participants from within Australia as well as from New Zealand, China, Belgium, the United States and Argentina. Subjects include a history of phytolith researchers in Australia, techniques for the use and analysis of phytolith and starch research, taphonomy and phytolith applications. The modern era of Australian phytolith research began in the 1980s and with increasing numbers of universities adding elements of phytolith studies for students and the high quality of research being conducted now phytolith research in Australia can be considered to have come of age. Such progress in the realms of archaeology, palaeoenvironmental studies and pedology is reflected in this collection. **Proceedings of the ... Annual**
