Picasso, 1905-1906 Pablo Picasso, Núria Rivero, 1992 The exhibition Picasso 1905 1906 has allowed an extension albeit only a temporary one of the permanent collections of the Picasso Museum in Barcelona It consisted in fact of a compilation of

the work which came immediately after Picasso's departure from Catalonia in April 1904 at the end of his Blue Period. Through this exhibition it has been possible to see the extent to which the artist's roots were fixed in the Catalan art of the end of the century. At the same time the artistic effervescence of Paris and his contacts with what was to become the vanguard of European culture stimulated him and encouraged his ceaseless determined search for a new and original form of painting which was to lead to a decisive change in his artistic language.

Reconciling Art and Technology Subrata Dasgupta, 2024-05-14 This book examines two venerable cultures art and technology and uses the young interdisciplinary of cognitive history combined with case studies of both ancient and modern artifacts to explore and unveil some of the bridges by which this reconciliation of two seemingly distant and oppositional cultures can be effected Art and technology are commonly regarded as oppositional While both are concerned with made things artifacts and both have their origins in pre literate antiquity the primary purposes they are intended for are quite distinct the artifacts of technology serve utilitarian purposes while those of art serve affective needs This opposition between art and technology notably argued by such scholars as Lewis Mumford and George Kubler is challenged in this book For when we consider art and technology as creative phenomena then many significant interesting and often subtle commonalities emerge whereby a reconciliation a unity of these two great cultures seems possible This book utilizes case studies of both ancient and modern artifacts ranging from the Nataraja sculpture of ancient India a great astronomical clock

of ancient China and Japanese Samurai swordmaking through Gothic cathedrals and Renaissance paintings of Europe to English Elizabethan machinery to the French Impressionists to modernist concrete structures and paintings in both East and West This book will be of interest to students and professional scholars interested in the histories of art and technology cultural history and creativity studies
