Quaternary Environment in Hungary Márton Pécsi, Ferenc Schweitzer, 1991 *Quaternary Environment in Hungary* Ferenc Schweitzer, Márton Pécsi, 1991 **Landform Evolution Studies in Hungary** Márton Pécsi, 1999 This summary of the main achievements in geomorphological and geogenetic research in Hungary is drawn from jubilee sessions held in 1997 to celebrate the founding of the Hungarian Geological Society and the Hungarian Geographical Society The three sections focus on working theories and elaborations concerning the geomorphic evolution of Hungarian land main geomorphic processes and surveying the relief and landforms Distributed by ISBS Annotation copyrighted by Book News Inc Portland OR

Palaeolimnological Proxies as Tools of Environmental Reconstruction in Fresh Water Krisztina Buczkó, János Korponai, Judit Padisák, Scott W. Starratt, 2010-05-30 Palaeolimnology is one of the most rapidly developing fields of limnology The primary objective of this volume is to present new palaeolimnological findings from eastern and central Europe Although this area has sometimes received less attention than other areas of Europe the lakes and mires coupled with the variability in landscape and the local differences in climate provide unique opportunity for studying palaeolimnology The volume starts with a review on late Quaternary records from the Carpathian region followed by new results on the history of a crater lake Lake Saint Ana glacial lakes in the Tatra Mountains and Lake Bled in Slovenia In addition the various papers provide new insights on the development of lakes and bogs during the late glacial and Holocene using a wide range of palaeolimnological proxies including diatoms pollen macrofossils pigments cladoceran remains chironomids chaoborids stable isotopes and geochemistry The motivation for collecting recent knowledge derives from the recognition of the importance and applicability of palaeolimnological tools to help in defining reference conditions as designated within the Water Framework Directives and estimating influence of global climate change on surface waters *Landscapes and Landforms of Hungary* Dénes

Lóczy, 2015-03-02 This volume is the first comprehensive description of the most spectacular landforms of Hungary It is a richly illustrated book which presents a collection of significant sites capturing the geodiversity of Hungarian landscapes The *Landscapes and Landforms of Hungary* discusses the effects of geomorphological features to the landscape such as volcanism weathering fluvial or aeolian erosion karst formation gravitational movements and others The importance of the conservation of geomorphological heritage is underlined as well as the importance of geomorphological heritage and conservation This book can be used for undergraduate and graduate courses in geomorphology physical geography hydrogeography and nature conservation It will be of benefit to environmental scientists geomorphologists conservationists among others **Löss** Márton Pécsi, Gerold Richter, 1996 **Lake Status Records from Europe** Ge Yu, 1995

Pleistocene Environment in Hungary Márton Pécsi, INQUA Hungarian National Committee, 1987 *Ecotones Between Forest and Grassland* Randall W. Myster, 2012-07-10 Ecotones are dynamic overlapping boundary areas where major terrestrial biomes meet As past studies have shown and as the chapters in this book will illustrate their structure size and

scope have changed considerably over the millennia expanding and shrinking as climate and or other driving conditions also changed Today however many of them are changing at a rate not seen for a long time perhaps largely due to climate change and other human induced factors Indeed ecotones are more sensitive to climate change than the biomes on either side and thus may serve as critical early indicators of future climate change As ecotones change they also redefine the limits of the biomes on either side by altering their distributions of species because in addition to their own endemic species any ecotone will also have species from both adjoining biomes Consequently they may also be places of high levels of species interaction serving as active evolutionary laboratories which generate new species that then migrate back into adjacent biomes Ecotones Between Forest and Grassland explores how these ecotones have changed in the past how they are changing today and how they are likely to change in the future The book includes chapters from around the world with a special focus on South American and Neotropical ecotones Zeitschrift für Geomorphologie ,1997 *Acta Geologica Hungarica* ,2004 Publishes original reports of studies in geology crystallography mineralogy petrography geochemistry and paleontology Concept of Loess, Loess-paleosol Stratigraphy Márton Pécsi,Ferenc Schweitzer,1995 Geomorphology and Changing Environments in Central Europe Hanna Bremer,Dénes Lóczy,1997 *Acta Geodaetica Et Geophysica Hungarica* ,1995 **Acta Botanica Hungarica** ,2001 **Mitteilungen der Österreichischen Geographischen Gesellschaft** Österreichische Geographische Gesellschaft,1993 **Studies in Geography in Hungary** ,1971 **Contemporary Essays in Austrian and Hungarian Geography** Elisabeth Lichtenberger,Márton Pécsi,1988 *The Middle to Upper Paleolithic Transition in Central Europe* Brian Adams,1998 The Buekk Mountain region of southeast central Europe has been the main area for studying transitional cultures between the Middle and Upper Palaeolithic like that identified at the Szelta Cave in Hungary **Geographical Essays in Hungary** György Enyedi,Márton Pécsi,1984
