## **Question Of Hermeneutics Essays In Honor Of Joseph J Kockelmans:**

*The Question of Hermeneutics* Timothy Stapleton, 1994-07-31 The essays included in this volume are illustrative of the depth and breadth of possibilities provided by hermeneutic philosophy and by a hermeneutically oriented phenomenology Among the topics considered the questions explored are How is hermeneutics situated within the general twentieth century philosophical climate What is its genuine essence its logos How does hermeneutics relate to traditional philosophy To Kant To Hegel To Husserl What possibilities does hermeneutics offer for a philosophy of the future What does it have to say about science about art about values about rationality and its limits about what it means to be who we are Such are the questions of this volume The Question of Hermeneutics Contributors include such well known philosophers as Otto Poggeler Karl Otto Apel Calvin Schrag Walter Biemel James Edie Thomas Seeböhm Adriaan Peperzak and others **The Existential**

**Phenomenology of Simone de Beauvoir** Wendy O'Brien, Lester Embree, 2013-06-29 While earlier research considered Simone de Beauvoir in the perspectives of Existentialism or Feminism this work is the first to emphasize her reflective and descriptive approach and the full range of issues she addresses There are valuable chapters and sections that are historical and or comparative but most of the contents of this work critically examine Beauvoir's views on old age whereon she is the first phenomenologist to work biology gender ethics ethnicity where she is among the first and politics again among the first Besides their systematic as well as historical significance these chapters show her philosophy as on a par with those of Merleau Ponty and Jean Paul Sartre in quality richness and distinctiveness of problematics and the penetration of her insight into collective as well as individual human life within the socio historical world **Metaphysics, Facticity, Interpretation**

D. Zahavi, Sara Heinämaa, Hans Ruin, 2012-12-06 The past decade has witnessed a notable turn in philosophical orientation in the Nordic countries For the first time the North has a generation of philosophers who are oriented to phenomenology This means a vital rediscovery of the phenomenological tradition as a partly hidden conceptual and methodological resource for taking on contemporary philosophical problems The essays collected in the present volume introduce the reader to the phenomenological work done in the Nordic countries today The material is organized under three general headings metaphysics facticity and interpretation The first part Metaphysics asks if phenomenology is or could be taken as a metaphysical inquiry It studies this possibility in a systematic as well as in a historical perspective The second part Facticity focuses on the double character of the philosophizing subject on the one hand as a worldly being bound by a cultural and historical situation and on the other hand as the one who thinks this condition and gives it an interpretation It studies four aspects of facticity in particular language dwelling alterity and generation The third part Interpretation clarifies the different notions of interpretation central to phenomenology understood as hermeneutics *Husserl's Logical Investigations Reconsidered* D. Fisette, 2013-03-09 The twelve original studies collected in this volume examine different aspects of Edmund Husserl's Logical Investigations They are authored by scholars and specialists internationally recognized for their expertise

in the fields of logic phenomenology history of philosophy and philosophy of mind They approach Husserl's groundwork from different angles and perspectives and shed new light on a number of issues such as meaning intentionality ontology logic etc

**Gurwitsch's Relevancy for Cognitive Science** Lester Embree, 2007-09-28 When I heard the rumor that the findings about the central nervous system obtained with new technology such as Magnetic Resonance Imaging MRI and Positron Emission Tomography PET were too subtle to correlate with the crude results of many decades of behavioristic psychology and that some psychologists were now turning to descriptions of subjective phenomena in William James Edmund Husserl and Maurice Merleau-Ponty and even in Buddhism I asked myself Why not Aron Gurwitsch as well After all my teacher regularly reflected on the types basic concepts and methods of psychology worked with Adhmar Gelb and Kurt Goldstein in the institute investigating brain injured veterans at Frankfurt in the 1920s conspicuously employed Gestalt theory to revise central Husserlian doctrines and taught Merleau-Ponty a thing or two That the last book from his Nachlass had recently been published and that I had recently written an essay on his theory of 1 psychology no doubt helped crystallize this project for me What is cognitive science At one point in assembling this volume I polled the participants asking whether they preferred the cognitive sciences or cognitive science Most who answered preferred the latter expression There is still some vagueness here for me but I do suspect that cognitive science is 2 another example of what I call a multidiscipline A multidiscipline includes participants who confront a set of issues that is best approached under more than one disciplinary perspective

**Phenomenology and the Non-Human Animal** Corinne Painter, Christian Lotz, 2007-07-26 The question of the relation between human and non-human animals in theoretical ethical and political regards has become a prominent topic within the philosophical debates of the last two decades This volume explores in substantial ways how phenomenology can contribute to these debates It offers specific insights into the description and interpretation of the experience of the non-human animal the relation between phenomenology and anthropology the relation between phenomenology and psychology as well as ethical considerations

**The Tenets of Cognitive Existentialism** Dimitri Ginev, 2011-09-20 In The Tenets of Cognitive Existentialism Dimitri Ginev draws on developments in hermeneutic phenomenology and other programs in hermeneutic philosophy to inform an interpretative approach to scientific practices At stake is the question of whether it is possible to integrate forms of reflection upon the ontological difference in the cognitive structure of scientific research A positive answer would have implied a proof that pace Heidegger science is able to think This book is an extended version of such a proof Against those who claim that modern science is doomed to be exclusively committed to the nexus of objectivism and instrumental rationality the interpretative theory of scientific practices reveals science's potentiality of hermeneutic self-reflection Scientific research that takes into consideration the ontological difference has resources to enter into a dialogue with Nature Ginev offers a critique of postmodern tendencies in the philosophy of science and sets out arguments for a feminist hermeneutics of scientific research

**Prima Philosophia**, 1999      **The Truthful and the Good** Robert

Sokolowski,1996-09-30 This book collects essays considering the full range of Robert Sokolowski's philosophical works his view of philosophy his phenomenology of language and his account of the relation between language and being his phenomenology of moral action and his phenomenological theology of disclosure      **Bibliographie internationale annuelle des mélanges** ,1995      **Phenomenological Inquiry** ,2009      The Philosophy of Hans-Georg Gadamer Hans-Georg Gadamer,1997 Hans Georg Gadamer is one of the leading exponents of hermeneutics with a formidable influence on thinking in the humanities The two main foci of his work have been Greek philosophy especially Plato and hermeneutics but his influences range through many sources from Kant to Heidegger This volume contains Gadamer's intellectual autobiography essays by leading philosophers Gadamer's replies to each essay and a bibliography of Gadamer's writings      International Philosophical Quarterly ,1995      **The Dictionary of Modern American Philosophers: K-Q** John R. Shook,Richard T. Hull,2005 This biographical dictionary contains around 900 entries on philosophers and other intellectuals who impacted philosophical thought in America from 1860 to the present i e 2005      **Husserliana Dokumente** ,1999      Interdisciplinary Interpretation Kenneth A. Reynhout,2013-06-20 The past fifty years has seen the emergence of an energetic dialogue between religion and the natural sciences that has contributed to a growing desire for interdisciplinarity among many constructive theologians However some have also resisted this trend in part because it seems that the price one must pay for such engagement is much too high Interdisciplinary work appears overly abstract and methodologically restrictive with little room for systematic theologians self consciously operating within a particular historical tradition In Interdisciplinary Interpretation Paul Ricoeur and the Hermeneutics of Theology and Science Kenneth A Reynhout seeks to address this concern by constructing an alternative understanding of interdisciplinary theology based on the hermeneutical thought of Paul Ricoeur generally recognized as one of the most interdisciplinary philosophers of the twentieth century Appealing to Ricoeur's view of interpretation as the dialectical process of understanding through explanation Reynhout argues that theology's engagement with the natural sciences is fundamentally hermeneutical in character As such interdisciplinary theologians can faithfully borrow meaning from the sciences through a process of interdisciplinary interpretation a process that can honestly attend to the legitimate challenges posed by the natural sciences without automatically requiring the evacuation of theological norms and convictions Reynhout's creative appropriation of Ricoeur's hermeneutics succeeds in providing a novel interdisciplinary vision not only for theology but also for interdisciplinary work in general      *American Catholic Philosophical Quarterly* ,2006      Alone in the World? Wentzel Van Huyssteen,2006 This study focuses on the notion of human uniqueness in science and theology It argues for an interdisciplinary approach in which theological anthropology has much to learn from humans origins from the dimension of meaning in which homo sapiens have always existed and from our close relationship to other animals      **Bibliographic Index** ,1997      *International Books in Print* ,1995 Barbara Hopkinson,[Anonymus AC01401231],1995
