

The Personal Vote

Thomas Zittel

INTRODUCTION: WHAT IS THE PERSONAL VOTE?

The personal vote is widely considered that portion of a candidate's electoral support that originates in his or her personal qualities, qualifications, activities, and record (Cain et al. 1987: 9). It thus by definition is a *non-partisan* vote rooted in individual candidates rather than in partisan ideologies and policies. Moreover, the literature on the issue needs to be kept distinct from debates on the personalization of politics (McAllister 2007). Students of the personal vote stress the elite level and the behavioral strategies of incumbent legislators to build personalized support bases among geographic constituents. In contrast, the concept of personalization points to the voter level and to the extent to which the main candidates of political parties affect vote choices. Obviously, both debates overlap and are interrelated. However, the personal vote-seeking concept is rooted in theories on legislative behavior, while the personalization concept advances from theories on voting behavior.

Originally, the literature on the personal vote focused with few exceptions on the strategic behavior of US Representatives. Among other works, it goes back to the seminal analyses of Morris Fiorina (1974, 1977). Fiorina perceived the increasing electoral margins and return rates in US House elections that he witnessed during the 1960s and 1970s to be a direct result of the strategic efforts of incumbents to focus on particularistic policies, to claim personalized credit in this regard, and to thus successfully build an incumbency advantage (see also Herrera and Yawn 1999). David Mayhew's ground-breaking book is a second

The Politics of Electoral Systems Michael Gallagher, Paul Mitchell, 2005-09-15 Electoral systems matter They are a crucial link in the chain connecting the preferences of citizens to the policy choices made by governments They are chosen by political actors and once in existence have political consequences for those actors They are an important object of study for anyone interested in the political process and in this book we subject them to systematic analysis In addition to some comparative chapters the book contains full accounts of the operation of electoral systems in 22 countries France the UK Germany Italy Israel Spain Austria Belgium Denmark Finland The Netherlands Ireland Hungary Russia Australia Canada India the USA Japan New Zealand Chile and South Africa The book provides detailed analyses of the operation of a diverse set of electoral systems in their national context Each chapter explains how the electoral system really works in the given country examining the strategic incentives the system provides to voters candidates and parties All country chapters have a common format and structure Successive sections analyse the institutional context how each electoral system was chosen historically how the current electoral system operates the rules mechanics and ballot structure and the political consequences of the current system the impact on the party system the internal life of parties and the impact on parliament and government formation Each country chapter then contains a final section which focuses on the politicization of electoral institutions In recent years many countries have changed their electoral systems either entirely or in part so there is a strong focus on the processes of electoral reform both historically and prospectively The book concentrates on the real world politics as well as the political science of electoral systems The book will be of interest to those concerned with the practical political business of electoral reform The book contains a wealth of evidence about the performance of various kinds of proportional representation and of non PR systems This will be invaluable for anyone interested in the question What would be the best electoral system for my country

Mr. Smith Goes to Ottawa David C. Docherty, 2011-11-01 In *Mr Smith Goes to Ottawa* the author compares the 34th 1988-93 and the 35th 1993-97 Parliaments The former the second consecutive Conservative led majority government could not appear more different from the Liberal one which followed Over two thirds of its members were rookies More significantly over one third represented two new political parties the Bloc Quebecois and the Reform party Yet for all this change Docherty shows that the new agendas of the 35th Parliament have not translated into changes in the legislative behaviour or socialization of new members Unlike Jimmy Stewart in Washington the majority of the men and women who go to Ottawa end up accepting a limited policy role

Party Personnel Strategies Matthew Soberg Shugart, Matthew E. Bergman, Cory L. Struthers, Ellis S. Krauss, Robert Pekkanen, 2021 Key party goals serve to advance a policy brand and maximize seats in the legislature This book offers a theory of how political parties assign their elected members their personnel to specialized legislative committees to serve collective organizational goals here known as party personnel strategies Individual party members vary in their personal attributes such as prior occupation gender and local

experience Parties seek to harness the attributes of their members by assigning them to committees where their expertise is relevant and where they may enhance the party's policy brand However under some electoral systems parties may need to trade off the harnessing of expertise against the pursuit of seats instead matching legislators according to electoral situation e.g. marginality of seat or characteristics of their constituency e.g. population density This book offers an analysis of the extent to which parties trade these goals by matching the attributes of their personnel and their electoral needs to the functions of the available committee seats The analysis is based on a dataset of around six thousand legislators across thirty eight elections in six established parliamentary democracies with diverse electoral systems

Building Party Systems in Developing Democracies Allen Hicken, 2009-01-12 Hicken analyzes the formation of nationally oriented political parties in democracies and its variation across countries using a theory of aggregation incentives
