

Central to this collection of essays by some of the leading scholars in the area of Anabaptist studies is the volume's historical, rhetorical and philosophical emphases. The first five chapters represent essays examining topics such as "Power and Religion in the Western Intellectual Tradition," "The Anabaptist Revolt and Political and Religious Power," and "Power and Authority in Mennonite Theological Development." These essays provide the reader's scholarly interest as a review of the western canon on power and authority in religion, and a narrative of Anabaptist emergence and selective history from the sixteenth through the early twentieth centuries. However, there is little in these essays to inform the present strand of inquiry into changing Anabaptist/Mennonite social and cultural norms as represented by the works of scholars such as Kraybill, Nolt, Kruse and Dorst.

Indeed, it is a category of this modern movement Redekop and Redekop do not mention at first — that of the "Mennonite culture wars" as Stephen Anlay names his essay — that the book has its greatest relevance for sociologists interested in study of current Anabaptist communities. The historical and philosophical essays provide a necessary common background for the discussions in the remaining four chapters. These include not only the moderate-fundamentalist controversies of American Mennonites, but also a discussion of Anabaptist ecclesiology from a feminist perspective, the difficulties of HIV/AIDS infection as a "Plain" family, and the transformation of power and authority models in the Mennonite communities of the Ukraine from the late eighteenth century into the early twentieth.

The "paradox of Anabaptism and power" (p. xii) for Redekop and Redekop is caught up in understanding "the early stages of understanding the exercise of power, authoring, and domination within the Christian tradition as a whole" (p. xi). In his concluding essay, Calvin Redekop reminds readers that to consider the problem of controlling power's corrupting influence as solved in the Anabaptist/Mennonite faith traditions is to ignore the example of power and its abuse

documented in the book's preceding essays. Jacob Loewen and Wesley Prich write from an historical perspective about the abuse of power among Mennonites in nineteenth century Ukraine. Joel Harman writes about the unnecessary infection of a woman and child with HIV/AIDS due to the "power" of tradition and maintenance of authority. Dorothy Yoder Nyce and Lynnda Nyce provide the feminist perspective emphasizing the need for women leaders to grasp power "through full ministry within the free church tradition" and rejection of a gender-based inequality mimicking the secular status quo. The senior Redekop acknowledges the limitations of power and authority in the Anabaptist tradition demonstrated in these and his other more generalised examples. However, in the end he restates the opening argument that Anabaptists were historically a primary source of a new paradigm for power and authority in Western Society. It is the promise still held open by this incomplete transformation the authors and editors in this volume wish to highlight as the legacy of the Anabaptist tradition in a new millennium.

Ruud Ganzevoort, Srđjan Sremac, 2018-08-11 This book focuses on the power of the ordinary everydayness and embodiment as keys to exploring the intersection of trauma and the everyday reality of religion It critically investigates traumatic experiences from a perspective of lived religion and therefore examines how trauma is articulated and lived in the foreground of people's concrete material actualities Trauma and Lived Religion seeks to demonstrate the vital relevance between the concept of lived religion and the study of trauma and the reciprocal relationship between the two A central question in this volume therefore focuses on the key dimensions of body language memory testimony and ritual It will be of interest to academics in the fields of sociology psychology and religious studies with a focus on lived religion and trauma studies across various religions and cultural contexts **Teaching New Religious Movements** David G. Bromley, 2007-05-25 Since its inception around 1970 the study of New Religious Movements NRMs has evolved into an established multidisciplinary field At the same time both the movements and the scholars who study them have been the subjects of intense controversy In this volume a group of senior NRM scholars who have been instrumental in the development of the field will offer pivotal essays that present the basics of NRM scholarship along with guidance for teachers on classroom use The book is organized topically around subjects that are both central to the study of NRMs and likely to be useful to non specialists Part I contains examinations of the definitional boundaries of the area of study varying disciplinary perspectives on NRMs unique methodological ethical problems encountered in the study of NRMs and the controversies that have confronted scholars studying NRMs and the movements themselves Part II examines a series of topics central to teaching about NRMs the larger sociocultural significance of the movements their distinctive symbolic and organizational features the interrelated processes of joining and leaving NRMs the organization of gender roles in NRMs media and popular culture portrayals of the movements the occurrence of corruption and abuse within movements and violence by and against NRMs Part III provides informational resources for teaching about NRMs which are particularly important in a field where knowing the biases of sources is crucial With its interdisciplinary approach the volume provides comprehensive accessible information and perspectives on NRMs It is an invaluable guide for instructors navigating this scholarly minefield **The SAGE Handbook of the Sociology of Religion** James A Beckford, Jay Demerath, 2007-10-29 In their introduction to this Handbook the editors affirm Many sociologists have come to realise that it makes no sense now to omit religion from the repertoire of social scientific explanations of social life I wholeheartedly agree I also suggest that this wide ranging set of essays should become a starting point for such enquiries Each chapter is clear comprehensive and well structured making the Handbook a real

asset for all those engaged in the field Grace Davie University of Exeter Serious social scientists who care about making sense of the world can no longer ignore the fact that religious beliefs and practices are an important part of this world This Handbook is a valuable resource for specialists and amateurs alike The editors have done an exceptionally fine job of incorporating topics that illuminate the range and diversity of religion and its continuing significance throughout the world Robert Wuthnow Princeton University At a time when religions are increasingly affecting and affected by life beyond the narrowly sacred sphere religion everywhere seems to be caught up in change and conflict In the midst of this contention and confusion the sociology of religion provides a rich source of understanding and explanation This Handbook presents an unprecedentedly comprehensive assessment of the field both where it has been and where it is headed Like its many distinguished contributors its topics and their coverage are truly global in their reach The Handbook s 35 chapters are organized into eight sections basic theories and debates methods of studying religion social forms and experiences of religion issues of power and control in religious organizations religion and politics individual religious behaviour in social context religion self identity and the life course and case studies of China Eastern Europe Israel Japan and Mexico Each chapter establishes benchmarks for the state of sociological thinking about religion in the 21st century and provides a rich bibliography for pursuing its subject further Overall the Handbook stretches the field conceptually methodologically comparatively and historically An indispensable source of guidance and insight for both students and scholars Choice Outstanding Academic Title 2009

Contemporary Encounters in Gender and Religion Lena Gemzöe, Marja-Liisa Keinänen, Avril Maddrell, 2016-11-16 The fields of gender and religious studies have often been criticized for neglecting to engage with one another and this volume responds to this dearth of interaction by placing the fields in an intimate dialogue Taking a multi disciplinary approach and drawing on feminist scholarship the book undertakes theoretical and empirical explorations of relational and co constitutive encounters of gender and religion Through varied perspectives the chapters address three interrelated themes religion as practice the relationship between religious practice and religion as prescribed by formal religious institutions and the feminization of religion in Europe

Current Policies and Practices in European Social Anthropology Education Dorle Dracklé, Iain R. Edgar, 2004 As Europe becomes more integrated at the economic and political level attempts are being made to harmonize education policies as well This text offers an important contribution in that the authors examine the politics and practices of social anthropology education across Europe

Der Verfasser hat sich selbst auf den Weg gemacht und dokumentiert eindrücklich in Wort und Bild, was auf den Philippinen *pasyon* genannt wird. Das vorliegende Buch kombiniert religionshistorische Recherche und ethnographische Feldstudie. Es eröffnet Zugang zu einer Innensicht des philippinischen Christentums, erschließt seine Binnenlogik und die Wechselbeziehungen von kolonialer Macht und lokalen Verhältnissen. Die Zusammenführung von Ethnologie und historischer Anthropologie zeigt, unter welchen Bedingungen sich Religion in der philippinischen Moderne artikuliert. Darüber hinaus wird hier ein wichtiger Beitrag zur Theoriedebatte über Körperlichkeit, Gewalt und Religion geleistet.

Introductory chapters lay the foundation for exploring varying research perspectives. Nine specific perspectives on research: post-positivism, pragmatism, constructivism, ethics and deliberate democracy, criticism, interpretivism, race, ethnicity, gender, arts-based research and post-structuralism are examined through discussions written by senior scholars known for their expertise in the perspective. And a guided tour of criticism is given in which these same scholars demonstrate the use of the critical method by critiquing six studies selected as exemplars of different research approaches. Of all our identities, cultural identity is one of the most central to who we think we are. We learn our cultural identities first within families, and the authors all examine the families they know best: their own.
