Personalities Of Antiquity:

Personalities of Antiquity Arthur Edward Pearse Brome Weigall,1932 *Gregory of Nyssa and the Concept of Divine Persons* Lucian Turcescu,2005-02-17 The concept of personhood is central to a wide range of contemporary issues ranging from reproductive rights to the death penalty and euthanasia We may think that the concept of person is a modern development In fact however this idea does not originate with our discovery of human rights consciousness and individuality In this study Lucian Turcescu shows that the fourth century theologian Gregory of Nyssa developed a very sophisticated concept of the person in the context of his attempts to clarify the paradox of the Trinity a single God comprising three distinct persons Turcescu offers the first in depth analysis of Gregory s writings about the divine persons He shows that Gregory understood personhood as characterized by uniqueness relationality and freedom He reasoned that the three persons of the Trinity have distinctive properties that make them individuals that is capable of being enumerated and circumscribed But this idea of individuation inherited from the neo Platonists falls short of expressing a clear notion of personal uniqueness By itself it would suggest that a person is merely a collection of properties Gregory s great contribution was to perceive the importance of relationality to personhood The three divine persons know and love each other are in communion with each other and freely act together in their common will This understanding argues Turcescu adds up to a concept of personal uniqueness much like our modern one Turcescu s work not only contributes to our knowledge of the history of Trinitarian theology but can be helpful to theologians who are dealing with issues in contemporary ethics **A**
