Personality Disorders And Community Health Teams:

Personality Disorder and Community Mental Health Teams Mark Sampson, Remy McCubbin, Peter Tyrer, 2006-01-04

Practitioners in Community Mental Health Teams CMHTs frequently find that traditional forms of support are ineffective when offered to patients with personality disorder. This book considers the various difficulties encountered with reference to current thinking about the origins, maintenance and treatment of personality disorder. Written by practitioners for practitioners, it provides a framework for developing effective care plans with minimal use of technical terms and jargon. Rather than promote an approach based on a single theoretical model, consideration is given to ways in which different approaches can be effectively combined within a multi-disciplinary team. The book is divided into two sections. The first outlines recent government initiatives relating to personality disorder and introduces key theories underlying psychological and biological treatments. The second focuses specifically on the role of the CMHT in relation to patients with these difficulties, including the assessment of personality functioning, developing coherent plans for treatment and support, optimising the therapeutic relationship, managing self-harming behaviour, particular challenges faced by CMHTs and how to overcome them, the views of service users, involving family, friends and carers. **Personality Disorder and Community Mental Health Teams** deals with the reality of services today. It is essential reading for all mental health practitioners in CMHTs working with people with personality disorder.

Structured Clinical Management (SCM) for Personality Disorder Stuart Mitchell, Mark Sampson, Anthony Bateman, 2021-12-16. Structured clinical management (SCM) is a unified approach to the treatment of people with personality disorder which is within reach of general mental health professionals without extensive additional training. However, implementation can be fraught with difficulties and clinical leads, managers and practitioners can struggle to implement SCM across complex mental health systems. This book provides an easy-to-read, practical and detailed guide on how mental health services can implement SCM in their current clinical pathways and how clinicians can transform their general techniques into a coherent interventional approach for people with personality disorder. Containing insights from clinical experts, researchers, service users and practitioners of SCM from across the UK and Europe, each chapter outlines a core aspect of the SCM model and its delivery in clinical services. Detailed case studies demonstrate real-world applications of the SCM model and details are provided about the involvement of carers and families, along with tips on enhancing clinical outcomes and increasing service user engagement. This book will be a valuable resource for qualified and in-training mental health professionals, including psychologists, nurses, occupational therapists, social workers and psychiatrists. It is particularly relevant to those involved in delivering first-line treatments to people diagnosed with Borderline Personality Disorder and other personality difficulties.
